m. *Description of Request*: The licensee requests a temporary variance of required minimum flows under Article 39 in Bear River, as measured at compliance gage YB–44, from September 14 through September 30, 2026. The licensee proposes to maintain a minimum of 5 cubic feet per second (cfs) during this period; Article 39 normally requires, in part, that the licensee maintain 10 cfs until the end of September. Granting this variance will enable the licensee to conduct inspection of the Drum Afterbay facilities and the Nevada Irrigation District to inspect and perform maintenance of the Dutch Flat 2 Flume and its intake gate. Releases will be passed through the dam's low-level outlet during the work, and license-required minimum flows will be re-established after the variance period ends.
