

(1) The fireworks, pyrotechnic devices, or fuses are manufactured in accordance with the applicable requirements in APA 87–1A (IBR, see § 171.7 of this subchapter), APA 87–1B (IBR, see § 171.7 of this subchapter), and APA 87–1C (IBR, see § 171.7 of this subchapter), as appropriate;

(2) The device must pass a thermal stability test. The test must be performed by maintaining the device, or a representative prototype of the device, at a temperature of 75 °C (167 °F) for 48 consecutive hours. When a device contains more than one component, those components that could be in physical contact with each other in the finished device must be placed in contact with each other during the thermal stability test;

(3) The manufacturer of the firework, pyrotechnic device, or fuse applies in writing to a DOT-approved Fireworks Certification Agency, and is notified in writing by the DOT-approved Fireworks Certification Agency that the firework has been:

(i) Certified that it complies with the APA 87–1A, APA 87–1B, and APA 87–1C, as appropriate, and meets the requirements of this section; and

(ii) Assigned an FC number.

(4) The manufacturer's application must be complete and include:

(i) Detailed diagram of the device;

(ii) Complete list of the chemical compositions, formulations and quantities used in the device;

(iii) Results of the thermal stability test; and

(iv) Signed certification declaring that the device for which certification is requested conforms to the APA 87–1A, APA 87–1B, and APA 87–1C, as appropriate, that the descriptions and technical information contained in the application are complete and accurate, and that no duplicate applications have been submitted to PHMSA. If the application is denied, the Fireworks Certification Agency must notify the manufacturer in writing of the reasons for the denial. As detailed in the DOT-approval issued to the Fireworks Certification Agency, following the issuance of a denial from a Fireworks Certification Agency, a manufacturer may seek reconsideration from the Fireworks Certification Agency, or may appeal the reconsideration decision of the Fireworks Certification Agency to the PHMSA Administrator.

(5) Fireworks Certification Agencies are only permitted to authorize UN0431 Articles, pyrotechnic under APA 87–1C.

(b) *Recordkeeping requirements.* Following the certification of each firework, pyrotechnic device, or fuse as permitted by paragraph (a) of this

section, the manufacturer and importer must maintain a paper record or an electronic image of the certificate, demonstrating compliance with this section. Each record must clearly provide the unique identifier assigned to the device and the Fireworks Certification Agency that certified the device. The record must be accessible at or through its principal place of business and be made available, upon request, to an authorized official of a Federal, State, or local government agency at a reasonable time and location. Copies of certification records must be maintained by each importer, manufacturer, or a foreign manufacturer's U.S. agent, for five (5) years after the device is imported. The certification record must be made available to a representative of PHMSA upon request.

Issued in Washington, DC, on August 4, 2026, under the authority delegated in 49 CFR 1.97.

Paul J. Roberti,

Administrator, Pipeline and Hazardous Materials Safety Administration.

[RTID 0648–XF951]

Pacific Halibut Fisheries of the West Coast; 2026 Catch Sharing Plan; Inseason Action; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment; correction.

SUMMARY: NMFS is correcting a temporary rule for the Pacific halibut recreational fishery in the International Pacific Halibut Commission's (IPHC) regulatory Area 2A. The action added fishing dates in August and September in the Columbia River and Washington subareas. The dates listed under each subarea were incorrect.

DATES: Effective August 5, 2026 through September 30, 2026.

FOR FURTHER INFORMATION CONTACT: Joshua Lindsay, (213) 392–7410, or Joshua.Lindsay@noaa.gov.

SUPPLEMENTARY INFORMATION:

Need for Correction

NMFS published a temporary rule on July 27, 2026, adding fishing dates in August and September in the IPHC regulatory Area 2A Columbia River and Washington subareas (91 FR 46866). The document contained incorrect dates for those subareas. These corrections are necessary to provide the correct information about the fishing days that are open to the recreational Pacific halibut fishery in Area 2A.

Classification

NMFS issues this action pursuant to the Northern Pacific Halibut Act of 1982. This action is taken under the regulatory authority at 50 CFR 300.63(c)(6) and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553 (b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest. The Assistant Administrator for Fisheries determined there is good cause to waive prior notice and an opportunity for public comment on this action as notice and comment would be impracticable and contrary to public interest because this action simply corrects an error in the July 27, 2026, temporary rule (91 FR 46866). It is important that these errors be corrected as quickly as possible. Immediate correction of the error is necessary to prevent confusion among participants in the fishery and to ensure management of the fishery is consistent with both the Council's intent for regulations developed over two public meetings and the public's expectations based on recommendations made in the Council's Catch Sharing Plan, as well as outreach materials distributed by the State of Washington. Thus, delaying this correction to engage in notice-and-comment rulemaking would be contrary to the public interest.

There is good cause under 5. U.S.C. 553(d)(3) to waive the 30-day delay in effective date. For the same reasons stated above, the Assistant Administrator for Fisheries has determined good cause exists to find that the 30-day delay in effectiveness does not apply to this correcting amendment. Delaying effectiveness of these corrections would result in confusion among fishery participants and would therefore be contrary to the public interest. Without waiving the 30-day delay in effectiveness, this correction to the season dates would not be effective prior to August 8, the date that the Columbia River and Washington South Coast subareas were

intended to open under the temporary rule (91 FR 46866; July 27, 2026), or by August 16 when the temporary rule intended to open the Puget Sound and Washington North Coast subareas. The temporary rule inadvertently attributed the August 8 opening date to the Puget Sound and Washington North Coast subareas, and mistakenly listed August 16 as the opening date for the Columbia River and Washington South Coast subareas. The correct additional season dates should be implemented as originally planned to promote the optimal harvest of the subareas' annual allocations. It is therefore in the public's interest that this action not be delayed.

Corrections

In FR Doc. 2026–15093, published July 27, 2026, at 91 FR 46866, the following corrections are made:

1. On page 46867, in the first column, under the heading: *Washington Puget Sound and the U.S. Convention Waters in the Strait of Juan de Fuca (Puget Sound Subarea)* correct the second sentence to read as follows:

“Sufficient allocation remains for at least another full day of fishing; therefore, this action opens the Puget Sound subarea 7 days per week from August 16 through September 30, 2026, or until there is not sufficient allocation for another full day of fishing and the area is therefore closed.”

2. On page 46867, in the first column, under the heading: *Washington North Coast Subarea* correct the second sentence to read as follows:

“Sufficient allocation remains for at least another full day of fishing; therefore, this action opens the North Coast subarea 7 days per week from August 16 through September 30, 2026, or until there is not sufficient allocation for another full day of fishing and the area is therefore closed.”

3. On page 46867, in the first column, under the heading: *Washington South Coast Subarea* correct the second sentence to read as follows:

“Sufficient allocation remains for at least another full day of fishing; therefore, this action opens the South Coast subarea 7 days per week from August 8 through September 30, 2026, or until there is not sufficient allocation for another full day of fishing and the area is therefore closed.”

4. On page 46867, in the first and second columns, under the heading: *Columbia River Subarea* correct the second sentence to read as follows:

“Sufficient allocation remains for at least another full day of fishing; therefore, this action opens the Columbia River subarea 7 days per week from August 8 through September 30,

2026, or until there is not sufficient allocation for another full day of fishing and the area is therefore closed.”

Authority: 16 U.S.C. 773–773k.

Dated: August 5, 2026.

Shannon Bettridge,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[Docket No. 260305–0066; RTID 0648–XF877]

Fisheries of the Exclusive Economic Zone Off Alaska; Reapportionment of Halibut Prohibited Species Catch Limits in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reallocation.

SUMMARY: NMFS is reapportioning the unused amounts of the Pacific cod Trawl Cooperative (PCTC) Program halibut prohibited species catch (PSC) limit to the Pacific cod trawl limited access catcher vessel sector C season in the Bering Sea and Aleutian Islands management area (BSAI).

DATES: Effective August 7, 2026, through 2400 hours, Alaska local time (A.l.t.), November 1, 2026.

FOR FURTHER INFORMATION CONTACT: Andrew Olson, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared and recommended by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2026 Pacific cod fishery halibut PSC limits specified for the PCTC Program A and B seasons (January 20–June 10) is 220 metric tons (mt) and for the trawl catcher vessel C season (June 10–November 1) it is 15 mt as established by the final 2026 and 2027

harvest specifications for groundfish in the BSAI (91 FR 11750, March 10, 2026). Halibut PSC limits for the Pacific cod fishery are apportioned between the PCTC Program, the trawl limited access catcher vessel sector C season, and American Fisheries Act catcher/processors as established under § 679.131(c). Any unused PCTC Program halibut PSC limits may be reapportioned to the trawl limited access catcher vessel sector C season under § 679.131(c)(3).

The Regional Administrator, Alaska Region, NMFS (Regional Administrator) has determined that during the A and B seasons 100 mt of halibut PSC limit apportioned to the PCTC Program was not caught. The B season closed on June 10, 2026. The Regional Administrator also determined that reallocating the PCTC Program's unused halibut PSC limit to the trawl limited access catcher vessel sector C season is appropriate. Therefore, in accordance with § 679.131(c)(3) and (h), NMFS reapportions 100 mt of the halibut PSC limit for the PCTC Program to the trawl limited access catcher vessel sector C season, which increases this sector's halibut PSC limit apportionment to 115 mt. This action is authorized by § 679.131(c)(3) and (h), which allows for unused halibut PSC limits to be reapportioned to the C season, and is necessary to account for the trawl catcher vessel sector's C season halibut PSC.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and from providing an accounting of the reapportionment of unused halibut PSC limits to the trawl limited access catcher vessel C season authorized under § 679.131. Without this authorized reapportionment, this could result in exceeding the halibut PSC limit for the trawl limited access catcher vessel sector. NMFS was unable to publish a notice providing time for public comment because the most recent relevant data for halibut PSC by those
