- Vascular and Hematology Integrated Review Group

5. *Justification that the information or advice provided by the Federal advisory committee or subcommittee is not available from another Federal advisory committee, another Federal Government source, or any other more cost-effective and less burdensome source:*

FICAB provides expert advice in global health research, training, international collaboration, and research capacity strengthening that is not available from other Federal Advisory Committees or government sources. FIC Advisory Board members bring specialized scientific expertise and extensive experience working internationally and conducting global research. There is no comparable committee with the unique combination of expertise in research and global health. The independent expertise of the Board strengthens FIC's global health research and training activities and helps to ensure these activities align with U.S. and NIH health, security, and scientific policies and goals.

The costs to convene FICAB are described in response to item #1. The Board conducts the statutorily required second-level review of grant applications, ensuring appropriate evaluation of funding recommendations following initial peer review. This grant review cannot be conducted through more cost-effective or less burdensome alternative mechanisms.

6. *If the consultation is a committee renewal, a summary of the previous accomplishments of the committee and the reasons it needs to continue:*

FIC's uniquely international mission requires external expertise to support sound decision-making, responsible use of public funds, and alignment with U.S. priorities. The Board has played a key role in shaping FIC's strategic direction, program priorities, and funding decisions. Its guidance has helped to ensure that FIC's portfolio remains rigorous, relevant, and aligned with NIH and HHS priorities. The Board has also provided advice to shape NIH global research that has helped position the U.S. as a global leader in biomedical research.

7. *Explanation of why the committee/subcommittee is essential to the conduct of agency business:*

FIC is essential to agency operations because it fulfills the required second-level review of FIC grant applications, as required under section 492 of the PHS Act. The Board also provides critical advice to the NIH Director and FIC Director on scientific, programmatic, and policy matters related to global health research. The Board advises on research investments and international collaborations that strengthen global capacity to detect, prevent, and respond to emerging health threats, thereby supporting U.S. health security. It also provides insight on program design and performance to ensure FIC's initiatives promote scientific excellence and responsible oversight of federal resources. This independent guidance ensures that FIC's portfolio aligns with U.S. health, security, and scientific policies and goals to make America safer, stronger and more prosperous.

In conclusion, this public interest determination documents that renewing the committee is in the public interest, essential to the conduct of agency business, and that the information to be obtained is not already available through another advisory committee or source within the Federal Government.

Inquiries may be directed to Patricia Brandt Hansberger, Acting Director, Office of Federal Advisory Committee Policy, Office of the Director, National Institutes of Health, 6701 Democracy Boulevard, Suite 1000, Bethesda, Maryland 20892 (Mail code 4875), Telephone (301) 496-2123, or patricia.hansberger@nih.gov.

National Institute on Deafness and Other Communication Disorders; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Deafness and Other Communication Disorders Advisory Council.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and

the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Deafness and Other Communication Disorders Advisory Council.

Date: September 3, 2026.

Time: 1:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: In Person and Virtual Meeting.

Contact Person: Rebecca Wagenaar-Miller, Ph.D., Director, Division of Extramural Activities, NIDCD/NIH, 6001 Executive Boulevard, Bethesda, MD 20892, (301) 496-8693, rebecca.wagenaar-miller@nih.gov.

Information is also available on the Institute's/Center's home page: <https://www.nidcd.nih.gov/about/advisory-council>, where an agenda and any additional information for the meeting will be posted when available.

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276-0361.

Comments are invited on: (a) whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d)

ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Extension to the Currently Approved 0930-0395 0930-0395 Generic Clearance for Grant Program Monitoring Activities

The Substance Abuse and Mental Health Services Administration (SAMHSA) is requesting approval from the Office of Management and Budget (OMB) for an extension of the generic information collection request (ICR) entitled Generic Clearance for Grant Program Monitoring Activities currently approved under the OMB number 0930-0395. This generic ICR allows SAMHSA to collect standardized information from its grant recipients necessary to perform agency program oversight activities such as monitoring progress on recipient activities and determining and responding to recipient's training and technical assistance (T/TA) needs. SAMHSA currently manages grant programs that provide prevention, treatment, recovery support services, and T/TA for substance use treatment and mental health providers along the continuum of care including prevention, harm reduction, treatment, and recovery. To carry out OMB Circular A-102¹ and 2 CFR part 215.51,² SAMHSA must collect grant program information necessary to ensure compliance with federal and programmatic requirements.

SAMHSA's grant recipients are currently required to submit various types of performance reports in accordance with their individual program requirements. For example, recipients often submit bi-annual progress reports as one form of information collection.

When required, performance reports shall generally contain, for each award, brief information on each of the following:

- Update on the status of key personnel required by the grant and staffing levels proposed by the recipient.
- Annual number of clients served, or individuals trained compared to the proposed/planned and the actual clients served/individuals trained.

¹ Circular A-102: Grants and Cooperative Agreements with State and Local Governments

² 2 CFR part 215.51: <https://www.govinfo.gov/content/pkg/CFR-2012-title2-vol1/pdf/CFR-2012-title2-vol1-subtitleA.pdf>.

- Comparison of actual progress and accomplishments with the goals and objectives established for the period.
- Obstacles and next steps for achieving established goals that were not met, if appropriate.
- Success stories of positive outcomes of clients served or impact of the program on the community.
- Other pertinent information including, when appropriate, program specific questions that reflect statutory requirements, the agency's strategic priorities, and/or program's policy goals.
- Information previously requested in a grant Notice of Funding Opportunities (NOFO).

SAMHSA program offices have ever-evolving monitoring needs, dependent on both internal and external factors, such as, but not limited to current grant recipient activities and needs; uses of federal funds; changes to aspects of programs based on statutory authority, federal regulations or policy, and/or Congressional appropriations; availability of program office funds for site visits (desk monitoring); matters of importance related to national health and safety needs of the public, or other events that lead to program changes. There are times when standardized collections of quantitative and qualitative information allows for program offices the ability to monitor recipient activities and needs.

A generic clearance would provide SAMHSA's program offices the flexibility to create and use tailored information collection templates based on current program reporting requirements. This is important to allow for SAMHSA's:

- Monitoring of compliance with federal practice, guidelines, and requirements,
- Oversight of the implementation of the scope of the grant activities with the grant recipients' proposed project,
- Assessment of the efficiency and efficacy of recipient activities,
- Quick understanding of and remediation to national, regional, and/or site-specific issues,
- Provision of additional support and technical assistance, as needed,
- Documentation of promising practices, innovative services, and program strengths, and
- Flexible and responsive oversight of federal funds.
