

DEPARTMENT OF HEALTH AND HUMAN SERVICES**National Institutes of Health****Proposed Collection; 60-Day Comment Request Generic Clearance for the Collection of Customer Participation and Performance Management With NIH Programs, Products, and Services (Office of the Director)****AGENCY:** National Institutes of Health, HHS.**ACTION:** Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995 to provide an opportunity for public comment on proposed data collection projects, the National Institutes of Health, National Cancer Institute (NCI) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments regarding this information collection are best assured of having their full effect if received by September 7, 2026.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Diane Kreinbrink, Program Manager, Office of Management Policy and Compliance, National Cancer Institute, 9609 Medical Center Drive, Room 2W446, Bethesda, Maryland 20892 or call non-toll-free number (240) 276-7283 or email your request, including your address to: diane.kreinbrink@nih.gov. Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork

Reduction Act of 1995 requires: written comments and/or suggestions from the public, and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Generic Clearance for the Collection of Customer Participation and Performance Management with NIH Programs, Products, and Services (NIH), 0925-0778; Expiration Date 9/30/2026, Extension, National Institutes of Health (NIH).

Need and Use of Information Collection: Evaluating the effectiveness of leadership, programs, and services is essential for the vitality of any institution. Leadership review at NIH focuses on the productivity of the IC, management of resources and budget allocations, training activities, and influence on dimensions of diversity, inclusion, promotion of investigators and staff (including NIH Equity Committee (NEC) reports), and positive workforce culture.

Program and service reviews may focus on operational performance; outputs, outcomes, and impacts; policy compliance, stewardship, diversity, equity, and inclusion. Both types of

reviews and evaluations may solicit input from IC staff and leadership (IC Director, Deputy Director, E.O.) and relevant program participants and stakeholders about the program's effectiveness, leader, or process. They may include comparisons with other ICs or programs, external benchmarks, and outcome metrics where appropriate and applicable. This input should provide meaningful information that can be used to identify strengths and areas that need improvement. Reports developed from the review or evaluation may be presented by the IC Director to the IC's Advisory Council or Board, to other IC or NIH leadership (such as the Deputy Director for Intramural Research and the NIH Director), or to program participants or the broader public. Such reports may include recommendations and proposed actions to address areas for improvement. In public or broadly shared reports, any sensitive information in the reviews or evaluations will be summarized and presented in aggregate.

This clearance will allow direct assessment and measurement of the customer/respondent base for participation in and satisfaction with NIH programs, products, and services. The clearance will also enable offices to assess participants' experience and accomplishments during or since participation and their preferences for existing and future programming, products, and services. The information collected using these tools informs and supports budgeting, program management and design, program planning, results reporting, information dissemination, and outreach initiatives.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 3,375.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden Hour
Individuals, Households, Private Sector, State Government, Local Government, Tribal Government, or Federal Government.	Performance Measurement.	500	1	30/60	250
	Interviews	1,000	1	1	1,000
	Program Reviews	500	1	45/60	375
	Surveys	5,000	1	15/60	1,250
	Focus Groups	500	1	1	500
Totals			7,500		3,375

The Deputy Director for Extramural Research, Jon Lorsch, having reviewed and approved this document, authorizes Alycia Booth, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Dated: July 6, 2026.

Alycia Booth,

Federal Register Liaison, National Institutes of Health.

SUPPLEMENTARY INFORMATION: On April 30, 2024, the White House National Security Council published the National Security Memorandum 22 (NSM–22) on Critical Infrastructure Security and Resilience, which builds on the important work that the Cybersecurity and Infrastructure Security Agency has been undertaking in partnership with

America's critical infrastructure communities. Replacing the previous Presidential Policy Directive 21 (PPD–21) on Critical Infrastructure Security and Resilience, is the National Security Memorandum will help ensure U.S. critical infrastructure can provide the nation a strong and innovative economy, protect American families, and enhance our collective resilience to disasters before they happen, strengthening the nation for generations to come. This National Security Memorandum specifically:

- Task the U.S. Department of Homeland Security to coordinate the national effort to enhance the security and resilience of United States critical infrastructure and provide strategic guidance on this national effort, with Cybersecurity and Infrastructure Security Agency acting as the National Coordinator for the Security and Resilience of U.S. Critical Infrastructure. The Secretary of Homeland Security will be required to submit to the President a biennial National Risk Management Plan that summarizes U.S. government efforts to mitigate risk to the nation's critical infrastructure.

- Reaffirms the designation of 16 critical infrastructure sectors and establishes a federal department or agency responsible for managing risk within each of these sectors.

- Elevates the importance of minimum security and resilience requirements within and across critical infrastructure sectors, consistent with the National Cyber Strategy, which recognizes the limits of a voluntary approach to risk management in the current threat environment.
