

6. Are there objective criteria to measure grantee capacity and concentration of damage in regards to determining the appropriate jurisdiction to receive the allocation? HUD is seeking comment on a policy that assumes states are generally going to have more capacity and HUD's preference will be to award grants to states unless HUD's review of capacity and concentration of damage warrant allocation to local governments or Indian tribes. For tribes, HUD is seeking comments on a general policy that, if a tribe receives a disaster declaration and the disaster meets the definition of catastrophic, HUD's Office of Native American Programs make the determination of tribal capacity to administer the grant.

7. Are there other objective criteria HUD should consider for assessing concentration of damage to inform grantee determinations and minimum allocation thresholds?

8. Is there research and data that could inform HUD on how to calculate an additional amount to be provided for mitigation depending on type of disaster? HUD is seeking comments offering research that would recommend different percentages (not to exceed 18 percent) by disaster type.

9. How might HUD consider repetitive loss data (*i.e.*, properties that have experienced damage from multiple disasters) or damage to critical infrastructure in the allocation formula?

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-7106-N-35]

Privacy Act of 1974; System of Records

AGENCY: Office of Chief Information Officer (OCIO), and Infrastructure and Operations (IOO), HUD.

ACTION: Notice of a new system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended, the Department of Housing and Urban Development (HUD), Office of Chief Information Officer (OCIO), and Infrastructure and Operations (IOO), is issuing a public notice of its intent to establish a Privacy Act System of Records Notice (SORN) titled "Sumo Logic." Sumo Logic serves as HUD's Security Information and Event Management (SIEM) tool, supporting centralized log collection, aggregation, and security monitoring. It collects system log data from HUD applications, infrastructure, security tools, and cloud platforms, and performs event correlation, custom searches, dashboard monitoring, scheduled reporting, and other standard security monitoring. This newly established system will be included in HUD's inventory of record systems. HUD had previously published a SORN for this system on June 10, 2026 (91 FR 35248). However, the underlying authority was revoked and replaced. Accordingly, HUD withdraws the SORN published on June 10, 2026, and instead publishes this SORN with the updated authority.

DATES: Comments will be accepted on or before September 14, 2026. This proposed action will be effective on the date following the end of the comment period unless comments are received which result in a contrary determination.
