information is necessary for the proper
performance of the functions of the
agency, including whether or not the
information will have practical utility;
- (2) The accuracy of our estimate of the
burden for this collection of
information, including the validity of
the methodology and assumptions used;
- (3) Ways to enhance the quality,
utility, and clarity of the information to
be collected; and

- (4) How might the agency minimize
the burden of the collection of
information on those who are to
respond, including through the use of
appropriate automated, electronic,
mechanical, or other technological
collection techniques or other forms of
information technology, *e.g.*, permitting
electronic submission of response.
