AGENCY: National Institutes of Health,
HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995 to provide an opportunity for public comment on proposed data collection projects, the National Institutes of Health, National Cancer Institute (NCI) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments regarding this information collection are best assured of having their full effect if received by September 16, 2026.

Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: This proposed information collection was previously published in the **Federal Register** on June 12, 2026 (Vol. 91, No. 113, FR 35694) and allowed 60 days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Cancer Institute (NCI), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

Proposed Collection Title: Specimen Resource Locator (NCI), 0925-0703: Expiration Date 08/31/2026, EXTENSION, National Cancer Institute

(NCI), National Institutes of Health (NIH).

Need and Use of Information Collection: Department of Health and Human Services (DHHS), National Institutes of Health (NIH), and National Cancer Institute (NCI) seek to obtain OMB approval to extend the Specimen Resource Locator (SRL) collection for an additional three (3) years. The availability of specimens and associated data is critical to increase our knowledge of cancer biology and to translate important research discoveries into clinical applications. The discovery and validation of cancer prevention markers require access, by researchers, to quality clinical biospecimens. In response to this need, the National Cancer Institute's (NCI) Cancer Diagnosis Program has developed and is expanding a searchable database: Specimen Resource Locator (SRL). The SRL allows scientists in the research community and the NCI to locate specimens needed for their research. The SRL lists non-commercial, either NCI or non-NCI-supported human biorepositories and their links. This administrative submission is an online form that collects information to manage and improve a program and its resources for the use of all scientists. This submission does not involve any hypothesis-driven analysis or research; only descriptive program-management metrics are used.

OMB approval is requested for three years. There are no costs to respondents other than their time. The estimated annualized burden hours are 107.
