

listed above, contained clarifying information and did not expand the license transfer application beyond the scope of the original notice.

By implementing this indirect license transfer, the Applicants seek to maintain private equity investment in EnergySolutions' decommissioning, waste management and nuclear services business by investment managers with considerable experience in this sector as well as to help grow EnergySolutions' business through the investment experience of Bridgepoint Group, PLC. This indirect transfer of control will have no material impact on the Licensees and the activities conducted under the Licenses. The Licensees will maintain responsibility for all licensed activities at the facilities, including the responsibility to complete decommissioning and carry out spent nuclear fuel management in accordance with NRC regulations. This indirect transfer of control will not affect the organizations or operations of the Licensees, nor will it have any material impact on their existing technical and financial qualifications as discussed below.

The NRC received two public comments on the license transfer application. The staff reviewed the comments and determined that neither of them contained information that was within the scope of this action. They are referenced in the NRC staff's safety evaluation of the license transfer application.

Under 10 CFR 30.34, no license issued or granted pursuant to the regulations in this part, nor any right under a license shall be transferred, directly or indirectly, through transfer of control of any license to any person, unless the Commission shall, after securing full information, find that the transfer is in accordance with the provisions of the Act and shall give its consent in writing. Under 10 CFR 50.80, no license for a production or utilization facility, or any right thereunder, shall be transferred, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, unless the Commission gives its consent in writing. Under 10 CFR 72.50, no license or any part included in a license for an ISFSI shall be transferred, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, unless the Commission gives its consent in writing. Under 10 CFR 110.50, a specific license may be transferred, disposed of or assigned to another person only with the approval of the Commission.

Upon review of the information in the application, as supplemented, and other information before the NRC, and relying on the representations contained in the application, the NRC staff has determined that Bridgepoint Group, PLC is qualified to indirectly hold the NRC licenses, to the extent described in the application, and that the indirect transfers of the licenses are otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission pursuant thereto. The NRC staff has also determined that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, (2) there is reasonable assurance that such activities will be conducted in

compliance with the Commission's regulations, and (3) the transfers will not be inimical to the common defense and security or to the health and safety of the public. The findings set forth above are supported by an NRC staff safety evaluation dated the same date as this order, which is available at ADAMS Accession No. ML26210A366.

III.

Accordingly, under Sections 161b, 161i, 161o, and 184 of the AEA; 42 U.S.C. 2201(b), 2201(i), 2201(o), and 2234; and 10 CFR 30.34, 10 CFR 50.80, 10 CFR 72.50 and 10 CFR 110.50, *it is hereby ordered* that the application for the indirect transfer of the licenses from EnergySolutions to Bridgepoint Group, PLC, as described herein, is approved.

It is further ordered that the Applicants shall, at least 2 business days before the planned closing of the indirect license transfer transaction, inform the Director of NMSS in writing of the planned closing date. Should the proposed transfer not be completed within 1 year of this Order's date of issuance, this Order shall become null and void; provided, however, that upon written application and for good cause shown, such date may be extended by order. The condition of this Order may be amended upon application by the Applicants and approval by the NRC.

This Order is effective upon issuance.

For further details with respect to this Order, see the license transfer application dated April 24, 2026, and the associated NRC staff safety evaluation dated August 12, 2026, which are available for public inspection at the Commission's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike, Rockville, Maryland. Publicly available documents are accessible electronically through ADAMS in the NRC Library at <https://www.nrc.gov/reading-rm/adams.html>. Persons who encounter problems with ADAMS should contact the NRC's PDR reference staff by telephone at 1-800-397-4209 or 301-415-4737 or by email to PDR.Resource@nrc.gov.

Dated: August 12, 2026.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2022-0052]

Regulatory Guide: Acceptability of Probabilistic Risk Assessment Results for Non-Light Water Reactor Risk-Informed Activities

AGENCY: Nuclear Regulatory Commission.

ACTION: Trial guide; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for trial use, Revision 1 to Trial Regulatory Guide (RG) 1.247, "Acceptability of Probabilistic Risk Assessment Results for Non-Light Water Reactor Risk-Informed Activities." This guidance describes one acceptable approach for determining whether the acceptability of the probabilistic risk assessment (PRA) used to support a PRA application is sufficient to provide confidence in the results for non-light water reactors (NLWRs) and risk-informed activities. Trial RG 1.247 was originally issued in March 2022 with a 2-year trial period that ended in May 2024. The staff is issuing Revision 1 to RG 1.247 (with minimal changes) as a trial RG so that it can continue to be used by potential applicants while the staff addresses the remaining technical issues that are best resolved by continuing to test the guide against actual applications. As a trial RG, this issuance does not provide final staff positions and the guidance within may be revised based on experience obtained by the NRC with its use after its publication.

DATES: Submit comments by October 19, 2026. Comments received during this public comment period will be considered and responded to. The public comment period will be followed by a 3-year trial use period. At any time during the trial use period, a member of the public may submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the "Regulatory Guide" series. This trial use period may be extended, as necessary, based on the experience obtained. After the trial use period, the NRC staff will develop and issue a draft RG that will include the stakeholder feedback and experience gained from use of the trial RG. The draft RG issuance will also provide an additional formal public comment opportunity, with feedback considered prior to final RG publication.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2022-0052. Address

questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301-415-1003; email: Bridget.Curran@nrc.gov. For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Office of Nuclear Material Safety and Safeguards, Mail Stop: TWFN-5-A85, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, ATTN: Guidance and Publications Branch.

For additional direction on accessing information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT:

Donna Williams, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-1322; email: Donna.Williams@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC-2022-0052 when contacting the NRC about the availability of information regarding this action. You may obtain publicly available information related to this action, by any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2022-0052.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin ADAMS Public Search.” For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2022-0052 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at <https://www.regulations.gov> as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for trial use Revision 1 to Trial RG 1.247 in the NRC's “Regulatory Guide” series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

This trial RG titled, “Acceptability of Probabilistic Risk Assessment Results for Non-Light Water Reactor Risk-Informed Activities,” is designated as Revision 1 to trial use RG 1.247 and is available in ADAMS under Accession No. ML26132A266.

It describes one acceptable approach for determining whether the acceptability of the PRA used to support an application is sufficient to provide confidence in the results, such that the PRA can be used in regulatory decision-making for NLWRs for implementing the requirements in part 50, and 52 of title 10 of the *Code of Federal Regulations* (10 CFR), or future applicable regulations. In addition, Trial RG 1.247 Revision 1 is intended to be consistent with the NRC's PRA Policy Statement and reflects, and endorses, with staff exceptions and clarifications,

national consensus PRA standards provided by standards development organizations and guidance provided by nuclear industry organizations.

On March 24, 2022, the NRC issued Trial RG 1.247 with a 2-year trial period that ended in May 2024 (87 FR 16770). Revision 1 to Trial RG 1.247 is being issued as a trial RG with minimal changes so that it can continue to be used by potential applicants while the staff addresses the remaining technical issues that are best resolved by continuing to test the guide against actual applications. The staff has determined that additional implementation experience would better inform draft and final staff positions. Such revisions would involve the development of a draft RG that would include lessons learned and public comments from use of this trial RG. The draft RG would also be available for public comment prior to issuance of a final RG. Therefore, the staff positions included in this trial RG could be different than the ones that would be included in the draft and final RG.

The staff previously issued a regulatory analysis (ADAMS Accession No. ML21235A010) with the original issuance of Trial RG 1.247 that remains applicable to the issuance of Revision 1. The staff develops a regulatory analysis to assess the value of issuing this new regulatory guide as well as alternative courses of action.

III. Backfitting, Forward Fitting, and Issue Finality

This trial RG does not establish a staff position for purposes of 10 CFR 50.109, “Backfitting” or constitute forward fitting as that term is defined and described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests” (ADAMS Accession No. ML18093B087). Any changes to this trial RG, such as withdrawal or addition of or modification to staff positions based on experience gained during the trial use period, prior to issuing a final RG will not be considered to be backfitting as defined in 10 CFR 50.109. This will ensure that the lessons learned from the regulatory trial use of the pilot applications of this RG are adequately addressed and that this guidance is sufficient to enhance regulatory stability in the review and approval of risk-informed applications for non-light water reactors.

IV. Congressional Review Act

This trial RG is a rule as defined in the Congressional Review Act (5 U.S.C.

801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

V. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the "Regulatory Guide" series.

VI. Executive Order (E.O.) 12866

The Office of Information and Regulatory Affairs determined that this trial RG is not a significant regulatory action under E.O. 12866.

Authority: 42 U.S.C. 2011 *et seq.*

Dated: August 18, 2026.

For the Nuclear Regulatory Commission.

Nicholee Valentine,

Chief, Guidance and Publications Branch,
Division of Guidance, Rulemaking, Economic
Analysis and Technical Editing, Office of
Nuclear Material Safety and Safeguards.

[FR Doc. 2026–17013 Filed 8–19–26; 8:45 am]

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: 3206–0156, Application for Death Benefits Under the Civil Service Retirement System, (SF 2800); Documentation in Support of Application for Death Benefits When Deceased was an Employee at the Time of Death, (SF 2800A) and Applying for Death Benefits Under CSRS Pamphlet, (SF 2800–1)

AGENCY: Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: Office of Personnel Management (OPM) offers the general public and other federal agencies the opportunity to comment on the reinstatement of an expired information collection request (ICR), Application for Death Benefits/Documentation and Elections in Support of Application for Death Benefits When Deceased Was an Employee at the Time of Death (CSRS).

DATES: Comments are encouraged and will be accepted until October 19, 2026.

ADDRESSES: You may submit comments on the Federal eRulemaking Portal at

<http://www.regulations.gov>. Follow the instructions for submitting comments. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT:

Retirement Services Publications Team, Office of Personnel Management, 1900 E Street NW, Room 6500–AS, Washington, DC 20415, Attention: Cyrus S. Benson, or via electronic mail at RSPublicationsTeam@opm.gov.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13) as amended (44 U.S.C. chapter 35), OPM is soliciting comments for this collection (OMB No. 3206–0156). The Office of Personnel Management is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Standard Form (SF) 2800 is needed to collect information so that OPM can pay death benefits to the survivors of Federal employees and annuitants in the Civil Service Retirement System (CSRS). SF 2800A allows OPM to collect the information needed for deaths in service, including information so that survivors can make the needed elections regarding military service. OPM is considering whether the SF 2800 and SF 2800A forms should be common forms since they are used by agencies across government.

Analysis

Agency: Retirement Operations, Retirement Services, Office of Personnel Management.

Title: Application for Death Benefits under the Civil Service Retirement

System (SF 2800); and Documentation and Elections in Support of Application for Death Benefits When Deceased Was an Employee at the Time of Death (SF 2800A).

OMB Number: 3206–0156.

Frequency: On occasion.

Affected Public: Individuals or Households.

Number of Respondents: SF 2800 = 59,750; SF 2800A = 250.

Estimated Time per Respondent: SF 2800 = 45 minutes; SF 2800A = 45 minutes.

Total Burden Hours: 27,113 (SF 2800 = 27,000; SF 2800A = 113).

Office of Personnel Management.

Alexys Stanley,

Federal Register Liaison.
