

Education Programs (OSEP) aimed at increasing the supply of qualified personnel in the field of special education. This program awards competitive grants to Institutions of Higher Education (IHEs) to support scholars who are preparing to provide special education and related services to children and youth with disabilities. Scholars who receive funding agree to work in the field of special education or related services for two years for each year of support they receive.

The information is collected through the web-based Personnel Development Program Data Collection System (PDPDCS) under the authority of the Individuals with Disabilities Education Act (IDEA) (20 U.S.C. 1462) and the implementing service obligation regulations at 34 CFR part 304, as well as reporting requirements under 34 CFR 75.110. Through the PDPDCS, grantees, scholars, and employers report data electronically.

The PDPDCS enables OSEP to meet its Congressional mandate by providing reliable data to assess program efficiency, performance, and effectiveness. Data collected are used to evaluate grantees' compliance with PDP program requirements, report program performance on GPRA measures to Congress, track scholar enrollment in training programs and subsequent service obligation fulfillment, and to refer scholars to the Accounts Receivable and Bank Management Division (ARBMD) for repayment of part or all of the scholarship received, if the scholars are not fulfilling their obligations through service.

Chief Data Officer, Office of Planning, Evaluation and Policy Development.

SUPPLEMENTARY INFORMATION:

Title: FERC-510, Application for Surrender of a Hydropower License.

OMB Control No.: 1902-0068.

Type of Request: Three-year extension of the FERC-510 information collection requirements with no changes to the current reporting requirements.

Abstract: FERC-510 includes the information collection burden pursuant to sections 4(e), 6, and 13 of the Federal Power Act (FPA) (16 U.S.C. 797(e), 799 and 806). Section 4(e) gives the Commission authority to issue licenses for the purposes of constructing, operating and maintaining dams, water conduits, reservoirs, powerhouses, transmission lines or other power project works necessary or convenient

for developing and improving navigation, transmission and utilization of power using bodies of water over which Congress has jurisdiction.

Section 6 gives the Commission the authority to prescribe the conditions of licenses including the revocation or surrender of the license. Section 13 defines the Commission's authority to delegate time periods for when a license must be terminated if project construction has not begun. Surrender of a license may be desired by a licensee when a licensed project is retired or not constructed, natural catastrophes have damaged or destroyed the project facilities, or a licensee otherwise no longer wishes to hold a license.

FERC-510 is the application for the surrender of a hydropower license.¹ The information is used by Commission staff to determine the broad impact of such surrender. The Commission will issue a notice soliciting comments from the public and other agencies and conduct a review of the application before issuing an order for Surrender of a License. The order is the result of an analysis of the information produced (*i.e.*, dam safety, public safety, and environmental concerns, etc.), which is examined to determine whether any conditions must be satisfied before granting the surrender. The order implements the existing regulations and applies to surrender of any type of hydropower authorization issued by FERC and its predecessor, the Federal Power Commission.

Type of Respondents: Non-Federal (Private or Municipal) Hydropower Licensees.

*Estimate of Annual Burden:*² The Commission estimates the total annual burden and cost³ for this information collection as follows:

¹ 18 CFR 6.1-6.4

² The Commission defines burden as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.

³ FERC estimates that industry hourly costs are similar to the Commission FY 2026 average salary plus benefits of \$213,003 per year (or \$102/hour).

Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hrs. & cost (\$) per response	Total annual burden hrs. & total annual cost (\$)	Cost per respondent (\$)
(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
10	1	10	80 hrs.; \$8,160	800 hrs.; \$81,600 ..	\$8,160

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: August 26, 2026.
