SUPPLEMENTARY INFORMATION:

Background

On March 16, 2023, Commerce found enriched ¹⁵N ammonium sulfate¹ to be within the scope of the scope of the *Orders*.² Cambridge Isotope Laboratories, Inc. (CIL) appealed Commerce's *Final Scope Ruling*. On March 11, 2026, the CIT remanded the *Final Scope Ruling* to Commerce, as the Court found that, although Commerce purported to rely on the *Orders*' plain language and 19 CFR 351.225(k)(1)(i)(A), Commerce's analysis in substance turned on the chemical composition of CIL's product, a part of its physical characteristics, which constitutes a 19 CFR 351.225(k)(2)(i)(A) factor.³ The Court stated that because Commerce engaged one (k)(2) factor while expressly declining to consider the other four, the Court found Commerce's determination contrary to the mandatory requirements of 19 CFR 351.225(k)(2)(i), which requires Commerce to consider all five factors if it proceeds to that level of the analysis.⁴ The Court instructed that if Commerce conducts a (k)(2) analysis on remand, it must consider all five factors.⁵

In its final remand redetermination, issued on July 9, 2026, Commerce found

enriched ¹⁵N ammonium sulfate isotope to be outside the scope of the *Orders*.⁶ The CIT sustained Commerce's final redetermination.⁷

Timken Notice

In its decision in *Timken*,⁸ as clarified by *Diamond Sawblades*,⁹ the U.S. Court of Appeals for the Federal Circuit held that, pursuant to section 516A(c) and (e) of the Tariff Act of 1930, as amended (the Act), Commerce must publish a notice of court decision that is not "in harmony" with a Commerce determination and must suspend liquidation of entries pending a "conclusive" court decision. The CIT's August 12, 2026, judgment constitutes a final decision of the CIT that is not in harmony with Commerce's *Final Scope Ruling*. Thus, this notice is published in fulfillment of the publication requirements of *Timken*.

Amended Final Scope Ruling

In accordance with the CIT's August 12, 2026 final judgment, Commerce is amending its *Final Scope Ruling* and finds that CIL's enriched ¹⁵N ammonium sulfate isotope is outside the scope of the *Orders*.

Liquidation of Suspended Entries

Commerce will instruct U.S. Customs and Border Protection (CBP) that, pending any appeals, the cash deposit rate will be zero percent for the enriched ¹⁵N ammonium sulfate isotope. In the event that the CIT's final judgment is not appealed or is upheld on appeal, Commerce will instruct CBP to liquidate entries of enriched ¹⁵N ammonium sulfate isotope without regard to antidumping and/or countervailing duties and to lift the suspension of liquidation of such entries.

Notification to Interested Parties

This notice is issued and published in accordance with sections 516A(c) and (e) and 777(i)(1) of the Act.

Continued

On July 1, 2025, the ITC instituted,⁴ and Commerce initiated,⁵ the third sunset review of the *Orders*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its reviews, Commerce determined that revocation of the *Orders* would likely lead to the continuation or recurrence of dumping and countervailable subsidies, and therefore, notified the ITC of the magnitude of the margins of dumping and/or subsidy rates likely to prevail should the *Orders* be revoked.⁶

On August 19, 2026, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Orders* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.⁷

Scope of the Orders

The merchandise subject to the *Orders* is certain welded carbon quality light-walled steel pipe and tube, of rectangular (including square) cross section, having a wall thickness of less than 4 mm.

The term carbon-quality steel includes both carbon steel and alloy steel which contains only small amounts of alloying elements. Specifically, the term carbon-quality includes products in which none of the elements listed below exceeds the quantity by weight respectively indicated: 1.80 percent of manganese, or 2.25 percent of silicon, or 1.00 percent of copper, or 0.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 1.25 percent of nickel, or 0.30 percent of tungsten, or 0.10 percent of molybdenum, or 0.10 percent of niobium, or 0.15 percent vanadium, or 0.15 percent of zirconium. The description of carbon-quality is intended to identify carbon-quality products within the scope. The welded carbon-quality rectangular pipe and tube subject to the *Orders* is currently classified under the Harmonized Tariff

Schedule of the United States (HTSUS) subheadings 7306.61.50.00 and 7306.61.70.60. While HTSUS subheadings are provided for convenience and Customs purposes, our written description of the scope of the *Orders* is dispositive.

Continuation of the Order

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, Commerce hereby orders the continuation of the *Orders*. U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the *Orders* will be August 19, 2026.⁸ Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next five-year reviews of the *Orders* not later than 30 days prior to fifth anniversary of the date of the last determination by the ITC.
