

investment in certified electronic health records (EHRs) resulted in higher-quality, lower-cost care. Subsequent legislation and regulations have continued to prioritize the sharing of data electronically across EHRs and other health information systems. Within the Department of Health and Human Services, the Office of the National Coordinator for Health IT (hereafter ONC) is responsible for coordinating across the federal government, industry, and the health care community to achieve nationwide interoperability of electronic health information exchange. Health information exchange organizations (HIOs) play a pivotal role facilitating health information exchange across disparate providers, labs, pharmacies, public health departments, and others. This information collection request will gather data from HIOs across the nation through the administration of a survey of HIOs to generate the most current national statistics and associated actionable insights to inform policy efforts. The timely collection of national data from our survey will assess current capabilities of HIOs to support effective electronic information sharing within the U.S. health care system and further aims to achieve nationwide interoperability.

Since prior to HITECH there has been ongoing assessment of trends in the capabilities of HIOs to support clinical exchange through nationwide surveys of HIOs. These prior surveys and studies have collected data on organizational structure, financial viability, geographic coverage, scope of services, implementation and use of standards, perceptions of information blocking, support for public health exchange, and participation in networks and the Technical Exchange Framework and Common Agreement (TEFCA). Continuing the ongoing data collection will be critical to construct a current and comprehensive picture of HIOs' role in facilitating exchange and ensuring rapid access to important health care data and information when it matters most, including vital data to address public health emergencies.

The survey will collect data on HIO capabilities to support electronic health information exchange, their maturity, and challenges they face. There are five key areas that require assessment: (1) adoption of technical standards; (2) perceptions related to information blocking; (3) network-to-network connectivity and TEFCA; (4) public health data exchange; and (5) organizational demographics, including technical capabilities offered by HIOs

and the challenges they face in supporting electronic health information exchange.

The survey is being revised (previously approved in 2022 and 2024; OMB Control No: 0955–0019) to reflect progress made and ongoing efforts in areas including public health, TEFCA, and information blocking to ensure alignment with current priorities such as improving public health interoperability and Make Health Tech Great Again. These updates were developed in consultation with subject matter experts (SMEs) to improve the relevance, clarity, and usefulness of the data collected in all five key areas of the survey. For example, certain questions with low response rates and have lower relevance to current priorities have been removed or reorganized. Some question and response wording have also been updated to ensure consistency with current policy efforts. For example, in the TEFCA section, the list of Qualified Health Information Networks (QHINs) have been updated to reflect the current list. These changes are intended to reduce respondent burden and improve overall data quality while maintaining continuity with prior surveys where appropriate.

This is a 3-year request for OMB approval.

ANNUALIZED BURDEN HOUR TABLE

Forms (If necessary)	Respondents (if necessary)	Number of respondents	Number of responses per respondent	Average burden per response	Total burden hours
HIO Survey	U.S. based public and private HIOs	85	1	1.0	85
Total					85

Based on a review of the information collection since our last request for OMB approval, we have made no adjustments to our burden estimate.
