AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; and request for comments.

SUMMARY: The U.S. Fish and Wildlife Service (Service) invites the public, as well as local, State, Tribal, and Federal agencies, to comment on recovery permit applications to conduct activities

intended to enhance the propagation and survival of endangered species under section 10(a)(1)(A) of the Endangered Species Act (ESA). With some exceptions, the ESA prohibits activities affecting ESA-listed species unless the Service issues a federal authorization, such as a permit, to allow for those activities. Prior to issuing 10(a)(1) permits for endangered species the Service must invite public comment and to consider any information received during the public comment period. We will consider all information received during the public comment period, before issuing any of the requested permits.

SUPPLEMENTARY INFORMATION: The U.S. Fish and Wildlife Service (Service) invites the public to comment on applications for permits under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16

U.S.C. 1531 *et seq.*), and our regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17. Any documents or other information submitted with the applications will be available for public review, subject to the requirements of the Privacy Act of 1974, as amended (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552).

Background

With some exceptions, the Act prohibits certain activities with listed species, including the take of listed wildlife, unless a Federal permit is issued that authorizes such activities. A recovery permit issued by the Service under section 10(a)(1)(A) of the Act authorizes otherwise prohibited take of listed species by the permittee while engaging in activities that are conducted for scientific purposes that promote recovery of the species, for enhancement of propagation, or survival of the species in the wild. The Service regulations implementing the Act's prohibitions and permitting requirements for listed species are set forth in 50 CFR part 17.

Permit Applications Available for Review and Comment

Section 10(c) of the Act requires the Service to publish notice of each

application in the **Federal Register** and to invite interested parties to submit written data, views, or arguments before we take final action on the permit application. Accordingly, we invite comments on these applications. The comments and recommendations that will be most useful, and likely to influence agency decisions, are those supported by quantitative information or studies. An interested party opposed to a recovery permit's issuance may object during the comment period by following the requirements in 50 CFR 17.22(d) and request notification of the final action. The Service will follow the procedures in that section regarding notification of interested parties who file objections to issuance of permits.

The proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild. Applications are sorted by regional offices that have jurisdiction over specific geographic areas. Information regarding each of our regions can be found at: <https://www.fws.gov/about/regions>.

We invite comments on the following applications:
