[Project No. 15423-000]

DeepGreen Cook Inlet SPV, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On February 11, 2026, as supplemented on June 26, 2026, DeepGreen Cook Inlet SPV, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the DeepGreen Cook Inlet Subsea-Compute & Infrastructure Hub Project (DeepGreen Project or project) to be located in the Upper Cook Inlet, East Foreland Corridor, Kenai Peninsula Borough, Alaska. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit

term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) approximately 330–350 marine hydrokinetic turbines utilizing a proprietary universal docking cradle system; (2) 66 modular subsea-compute hives (data center pods) integrated within the turbine array to utilize direct-coupled power and passive subsea cooling; (3) an approximately 3.5-mile long, 115 kV hybrid power/fiber-optic armored subsea cable; (4) a subsea cable landing site within the Nikiski Industrial Corridor, positioned between the Agrium Kenai Nitrogen Operations and the Kenai Liquefied Natural Gas Plant; and (5) appurtenant facilities. The estimated annual generation of the DeepGreen Project would be 100 megawatts, which would primarily be utilized to power the subsea data center. Spare electricity could be diverted to the grid via an interconnect with the Alaska Railbelt Grid at a dedicated terrestrial substation.
