FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CG Docket No. 03-123, GN Docket No. 25-133; FCC 26-56; FR ID 366314]

Telecommunications Relay Service ASCII Format Requirement

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) amends its rules to eliminate the requirement that Text Telephone (TTY)-based Telecommunications Relay Services (TRS) be capable of communicating in the American Standard Code for Information Interchange (ASCII) format. By removing this outdated regulatory mandate, the Commission relieves TRS

providers of the obligation to maintain costly and obsolete ASCII-compatible hardware and software systems. Eliminating this requirement will reduce inefficiencies, preserve the integrity of the TRS Fund, and allow providers to redirect resources toward modern relay technologies, all without adversely impacting functional equivalence for consumers who rely on TTY-based TRS.

DATES: Effective October 13, 2026.

FOR FURTHER INFORMATION CONTACT: Joshua Mendelsohn, Disability Rights Office, Consumer and Governmental Affairs Bureau, at (202) 559-7304 or Joshua.Mendelsohn@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities and Delete, Delete, Delete, Report and Order (*Order*) in CG Docket No. 03-123 and GN Docket No. 25-133, document FCC 26-56, adopted August 21, 2026 and released August 25, 2026. The full text of this document is available online at <https://docs.fcc.gov/public/attachments/FCC-26-56A1.pdf>.

Paperwork Reduction Act: The *Order* does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002.

Congressional Review Act: The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs, that this rule is “non-major” under the Congressional Review Act, 5 U.S.C. 804(2). The Commission sent a copy of the *Order* to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

Synopsis

1. Title IV of the Americans with Disabilities Act of 1990 (ADA), codified at section 225 of the Communications Act, requires the Commission to ensure that TRS is available “to the extent possible and in the most efficient manner” to enable people with hearing or speech disabilities to communicate in a manner that is functionally equivalent to voice communication service. 47 U.S.C. 225(a)(3), (b)(1). In accordance with this directive, the Commission has adopted mandatory minimum standards for TRS.

2. At that time, TTYs generally used the Baudot coding format, but the ASCII format was widely used to transmit data between personal computers over the telephone network. The Commission, believing that ASCII was “a superior technology” that would eventually supplant Baudot as the preferred format, required that TRS be able to transmit in both ASCII and Baudot at any speed generally in use. Over the last three decades, technological advancements have revolutionized the TRS landscape, and introduced forms of non-TTY-based TRS that do not rely on the ASCII and Baudot formats to transmit information.

3. Baudot remains the predominant TTY-based TRS format, currently accounting for almost all TTY-based TRS communications. Recognizing the obsolescence of the ASCII format, T-Mobile Accessibility (T-Mobile) filed a Petition for Rulemaking in August 2022, requesting the Commission to amend § 64.604(b)(1) of its rules, to eliminate the ASCII requirement. T-Mobile noted that ASCII-based TTY calls represent a tiny fraction of its overall TRS call minutes, and that complying with the requirement forces providers to incur unnecessary hardware costs and hinders network upgrades. Following a June 2023 request from T-Mobile for a temporary waiver of the rule, the Consumer and Governmental Affairs Bureau (Bureau) granted a conditional two-year waiver of the ASCII requirement to T-Mobile and Hamilton on November 22, 2024. On June 27, 2025, the Commission released a Notice of Proposed Rulemaking (NPRM), published at 90 FR 164, August 27, 2025, proposing to permanently delete the ASCII requirement from § 64.604(b)(1) of the Commission's rules.

4. The Commission adopts its proposal to delete the requirement in § 64.604(b)(1) of its rules, 47 CFR 64.604(b)(1), that TTY-based TRS support the ASCII format. The Commission also finds good cause to eliminate the definition of ASCII from the Commission's TRS rules. The record confirms that ASCII usage for TTY-based TRS is exceedingly small and continues to shrink. Data provided in the NPRM indicated that in a three-month period in 2022, total ASCII usage of TTY-based TRS did not exceed 87 minutes, representing approximately 0.01 percent of total TTY-based TRS minutes. Following waiver of the ASCII requirement in November 2024, one TTY-based TRS provider reports that it has not had a single request to have ASCII made available and the Commission has not received any inquiries or complaints from consumers
