

individual basis and is collected through the permit issuance and administration process. FS will collect information using several forms.

Need and Use of the Information: FS will use the information collected on the forms to acquire data from applicants applying for new grazing permits or making changes to their current grazing permit(s). FS also uses the information collected in administering the grazing use program on NFS land. If information were not collected it would be impossible for the agency to administer a grazing use program in accordance with the statutes and regulations.

Description of Respondents: Farms; Business or other for-profit; Individuals or households.

Number of Respondents: 1,661.

Frequency of Responses: Reporting: Annually; Other (as needed basis).

Total Burden Hours: 638.

Levi S. Harrell,

Departmental Information Collection Clearance Officer.

BILLING CODE 3411-15-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2025-0736]

Domestic Quarantine: Quarantined Areas and Regulated Articles

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of the changes made to our lists of domestic quarantined areas in 2025. These changes may be viewed on the relevant plant pest programs' websites.

FOR FURTHER INFORMATION CONTACT: Dr. Derek A. Woller, Senior Regulatory Policy Specialist, PPQ, APHIS, 5601 Sunnyside Ave., Beltsville, MD 20705; (480) 490-6454; Derek.A.Woller@usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 301 are designed to prevent the interstate spread of plant pests that are new to or not widely distributed within the United States. Subparts C through X (§§ 301.32 through 301.92-12, referred to below as the regulations) each address a specific plant pest and contain criteria for designating certain areas of the United

States as quarantined areas¹ for the specific plant pest. The regulations restrict the interstate movement of certain regulated articles from quarantined areas in order to prevent the spread of plant pests to noninfected areas of the United States.

In accordance with the regulations, APHIS keeps updated lists of quarantined areas on the relevant plant pest programs' websites, which are listed in the relevant subpart of the regulations. When a change to the status of a plant pest threat occurs, APHIS takes appropriate action to add, expand, remove, or reduce a quarantined area, and the relevant APHIS plant pest program updates the web-based list of quarantined areas for their program. APHIS also publishes a yearly notice informing the public of all updates to quarantined areas that have occurred since publication of the last notice informing the public of such updates.

Since our last notice² informing the public of updates to our lists of quarantined areas, the following actions revising our lists of quarantined areas have been taken. Updated lists of quarantined areas are available on the relevant plant pest programs' websites. For ease of access, direct links to each page are provided as footnotes in this document.
