BILLING CODE 4191-02-P

SURFACE TRANSPORTATION BOARD

Release of Waybill Data

The Surface Transportation Board has received a request from University College London, United Kingdom, (WB26-48-09/09/26) for permission to use select data from the Board's 2000 to 2025 inclusive, unmasked Carload Waybill Samples for railroad shipments of corn, soybeans, and wheat; all other commodities masked revenues and information to construct measures of rail-network utilization and congestion as explained in the request. A copy of this request may be obtained from the Board's website under docket no. WB26-48.

The waybill sample contains confidential railroad and shipper data; therefore, if any parties object to these requests, they should file their objections with the Director of the Board's Office of Economics within 14 calendar days of the date of this notice. The rules for release of waybill data are codified at 49 CFR 1244.9.

Any inquiries on this request should be directed to waybill@stb.gov.

Jeffrey Herzig,
Clearance Clerk.

BILLING CODE 4915-01-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2025-0658; Notice 1]

Ford Motor Company, Receipt of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: Ford Motor Company (Ford) has determined that certain model year (MY) 2024-2025 Ford Ranger motor vehicles do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 101, *Controls And Displays*. Ford filed a noncompliance report dated September 11, 2025, and subsequently petitioned NHTSA (the "Agency") on October 3, 2025, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety. This document announces receipt of Ford's petition.

DATES: Send comments on or before October 21, 2026.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited in the title of this notice and may be submitted by any of the following methods:

- **Mail:** Send comments by mail addressed to the U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- **Hand Delivery:** Deliver comments by hand to the U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except for Federal Holidays.
- **Electronically:** Submit comments electronically by logging onto the Federal Docket Management System (FDMS) website at <https://www.regulations.gov/>. Follow the online instructions for submitting comments.
- Comments may also be faxed to (202) 493-2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are

provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the fullest extent possible.

When the petition is granted or denied, notice of the decision will also be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the internet at <https://www.regulations.gov> by following the online instructions for accessing the dockets. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000 (65 FR 19477-78).

FOR FURTHER INFORMATION CONTACT:

Kamna Ralhan, General Engineer, NHTSA, Office of Vehicle Safety Compliance, (202) 366-6443.

SUPPLEMENTARY INFORMATION:

I. *Overview:* Ford determined that certain MY 2024-2025 Ford Ranger motor vehicles do not fully comply with paragraphs S5.1.2 and S5.2.1 of FMVSS No. 101, *Controls And Displays* (49 CFR 571.101) and filed a noncompliance report on September 11, 2025, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports*. Ford petitioned NHTSA on October 3, 2025, for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety, pursuant to 49 U.S.C. 30118(d) and 30120(h) and 49 CFR part 556, *Exemption for Inconsequential Defect or Noncompliance*.

This notice of receipt of Ford's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or another exercise of judgment concerning the merits of the petition.

II. *Vehicles Involved*: Approximately 76,125 MY 2024–2025 Ford Ranger motor vehicles, manufactured between December 9, 2022, and August 29, 2025, were reported by the manufacturer.

III. *Noncompliance*: Ford explains that the subject vehicles are equipped with an instrument panel cluster (IPC) that temporarily does not display the speedometer unit of measurement (MPH or km/h) under certain conditions and therefore does not comply with paragraphs S5.1.2 and S5.2.1 of FMVSS No. 101. Specifically, IPC does not display the speedometer unit of measurement for approximately four seconds while an animation displays after the driver changes the vehicle's drive mode.

IV. *Rule Requirements*: Paragraphs S5.1.2 and S5.2.1 of FMVSS No. 101 include the requirements relevant to this petition. Paragraph S5.1.2 requires that the telltales and indicators specified in Table 1 and Table 2, including their identifications, must be located to ensure visibility to a driver under the specified conditions of paragraphs S5.6.1 and S5.6.2 of FMVSS No. 101 when activated. Paragraph S5.2.1 further requires, in relevant part, that every control, telltale and indicator listed in column 1 of Table 1 or Table 2, with the exception of the Low Tire Pressure Telltale, must be identified by either the symbol in column 2 or the word or abbreviation in column 3 of the respective table.

V. *Summary of Ford's Petition*: The following views and arguments presented in this section, "V. Summary of Ford's Petition," are the views and arguments provided by Ford. They have not been evaluated by the Agency and do not reflect the views of the Agency. Ford describes the subject noncompliance and contends that the noncompliance is inconsequential as it relates to motor vehicle safety.

Ford explains that the subject vehicles are equipped with selectable drive modes, which are controlled by a rotary dial or a button on the center console and allow the driver to change the vehicle's handling and suspension dynamics. Ford notes that mode selection will not change the speed and can be performed in most instances while the vehicle is in motion or while it is in Park.

Ford explains that when the driver changes drive modes, an animation appears on the IPC that covers the speedometer's unit of measurement (e.g., MPH or km/h) for approximately four seconds. However, the numerical speed display (e.g., "60") remains continuously visible during this animation. To correct this, Ford has

implemented a software update for new production Ranger vehicles to continuously display the speed units during the animation sequence. The petition includes images illustrating the affected display and the corrected display and is available to view on the docket. Ford states that it is not aware of any field occurrences, accidents, or injuries related to this condition. Ford also notes that it has reviewed connected vehicle data from 8,800 MY 2024 Ranger vehicles, and found that drivers change out of the default Normal drive mode on less than five percent of all key cycles.

Ford believes that the subject noncompliance is inconsequential to motor vehicle safety for three primary reasons:

First, the primary speedometer's numerical speed remains continuously and accurately displayed, ensuring no incorrect information is presented. Ford explains that the subject noncompliance is limited solely to the temporary disappearance (up to four seconds) of the unit of measurement (MPH or km/h), an interval initiated by the driver's intentional action of changing drive modes.

Second, Ford states that it is unaware of any customer complaints, crashes, injuries, or fatalities related to this condition. Ford acknowledges that the absence of complaints is not dispositive but contends that this is further evidence that the drivers of the subject vehicle are not confused by the disappearance of the speedometer unit.

Third, Ford cites prior NHTSA grants of petitions for decisions of inconsequential noncompliances concerning similar noncompliances where required information was temporarily unavailable or incorrect. These include a 2022 FCA US LLC¹ petition concerning speedometers that could be intentionally switched to display only km/h, and a 2016 General Motors LLC² petition regarding a momentary instrument cluster reset after a series of driver actions. Ford contends that the subject noncompliance is similar to these grants.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and

30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that Ford no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicles distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after Ford notified them that the subject noncompliance existed.

(Authority: 49 U.S.C. 30118, 30120; delegations of authority at 49 CFR 1.95 and 501.8)

Otto G. Matheke III,

Director, Office of Vehicle Safety Compliance.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2026–1981 (Notice No. 2026–04)]

Hazardous Materials: Information Collection Activities

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), PHMSA invites comments on proposed updates to the form used for reporting incidents that occur during the transportation of hazardous materials. PHMSA intends to request a revision of a currently approved information collection from the Office of Management and Budget (OMB) for the *Hazardous Materials Incident Report* (DOT Form 5800.1; Form Approval OMB No. 2137–0039). Revisions include new data elements and clarifications of existing fields. PHMSA has also removed, simplified, or reorganized data elements to reduce the burden on filers and staff, alongside modernizing the form's visual layout. PHMSA encourages commenters to review a draft version of the new DOT Form 5800.1, which is provided as a Portable Document Format (PDF) file in the electronic Docket at [regulations.gov](https://www.regulations.gov). This draft of the new form does not replace the currently approved form. It
