

of the methodology and assumptions used;

—Evaluate whether the agency can enhance the quality, utility, and clarity of the information being collected, and if so, how; and

—Minimize the information collection's burden on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting people to submit electronic responses.

You may view this information collection request at www.reginfo.gov. Follow the instructions to view Department of Justice information collections currently under review by OMB and look for 1140–0097.

DOJ seeks PRA authorization for this information collection for three years. OMB authorization for an ICR cannot be for more than three years without renewal. DOJ notes that information collection requirements submitted to OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

Abstract: A person engaged in the business of manufacturing explosives is required to have a license under the provisions of 18 U.S.C. 843. The Federal Water Pollution Control Act, 33 U.S.C. 1341, requires manufacturers to certify that waste disposal practices are lawful with regard to impact on water sources. ATF Form 5400.30, Supplemental Information on Water Quality Considerations, serves this purpose and persons manufacturing explosives must submit it with their explosives license applications to ensure compliance with the water pollution control act

Type of information collection: revising a previously approved collection.

Title of the form/collection: Supplemental Information on Water Quality Considerations.

Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection: Form number: ATF Form 5400.30. Component: Bureau of Alcohol, Tobacco, Firearms, and Explosives; U.S. Department of Justice.

Affected public who will be asked or required to respond, and obligation to respond: Affected public: private sector for-profit institutions. **Obligation to respond:** voluntary, required to obtain/retain a benefit.

Total estimated number of respondents: 670 total respondents.

Estimated time per respondent: 20 minutes (0.3 hours).

Frequency: once annually.

Total estimated annual time burden: 201 total hours.

Total estimated annual other costs burden: There are no additional costs associated with this ICR because respondents can complete and submit the form entirely electronically.

Revisions to This Information Collection

ATF is revising information collection OMB 1140–0097, to reflect a decrease in the overall annual public burden. The number of respondents to this ICR have decreased from the last renewal in 2023, from 680 respondents to 670, because fewer persons applied for explosives licenses. This decrease also resulted in a corresponding decrease in the hourly burden, from 340 hours to 335. In addition, because the forms have become entirely electronic, the amount of time required to complete this information collection has decreased from 0.5 to 0.3 hours, further decreasing the hourly burden for this ICR to 201 hours.

As part of this renewal, ATF is also revising the form number from 5000.30 to 5400.30 to align with changes to ATF's numbering structure and is revising the title of the form and the ICR for plain writing purposes, from "Supplemental Information on Water Quality Considerations—Under 33 U.S.C. 1341(a)" to "Supplemental Information on Water Quality Considerations." In addition, ATF is making minor plain writing edits to text on the form.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2026–2014, in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized as follows.

1. *The title of the information collection*: Part 11 of title 10 of the *Code of Federal Regulations*, "Criteria and Procedures for Determining Eligibility for Access to or Control Over Special Nuclear Material."

2. *OMB approval number*: 3150–0062.

3. *Type of submission*: Extension.

4. *The form number, if applicable*: Not applicable.

5. *How often the collection is required or requested*: On occasion.

6. *Who will be required or asked to respond*: Employees (including applicants for employment), contractors, and consultants for NRC licensees, and contractors whose activities involve access to, or control over, special nuclear material at either fixed sites or for transportation activities.

7. *The estimated number of annual responses*: 778 (775 reporting responses and 3 recordkeepers).

8. *The estimated number of annual respondents*: 3.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 210.6 (210 reporting and 0.6 recordkeeping).

10. *Abstract*: The NRC's regulations in 10 CFR part 11 establish requirements for access to special nuclear material, and the criteria and procedures for resolving questions concerning the eligibility of individuals to receive special nuclear material access authorization. The specific part 11 requirements covered under this OMB clearance include requests for exemptions to part 11 requirements, amendments to security plans that require incumbents to have material access authorizations, and access authorization cancellations. In addition, licensees must keep records of the names and access authorization numbers of certain individuals assigned to shipments of special nuclear material. The information required by 10 CFR part 11 is needed to establish control over and maintain records of who is properly authorized to safeguard and have access to special nuclear material. Not knowing this information could cause harm to the public and national security.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.

2. Is the estimate of the burden of the information collection accurate? Please explain your answer.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Authority: 42 U.S.C. 2011 *et seq.*

Dated: September 17, 2026.

For the Nuclear Regulatory Commission.

Heather Dempsey,

Acting NRC Clearance Officer, Office of the Chief Information Officer.
