

state's waters. In designated vessel sewage NDZs, the discharge of both treated and untreated sewage from vessels is prohibited.

(B) *Uniform National Discharge Standards NDZs and Review of Discharge Determination or Standards:* CWA section 312(n), the Uniform National Discharge Standards (UNDS), requires EPA and the Department of War to establish uniform national discharge standards to control discharges incidental to the normal operation of a vessel of the Armed Forces. CWA section 312(n)(7) and the implementing regulations in 40 CFR part 1700 identify the information that a state must submit to EPA in the state's application to establish an NDZ for one or more UNDS discharges. A state may seek a NDZ designation for any UNDS discharge for which EPA and the Department of War have promulgated national standards of performance and corresponding implementing regulations, respectively. Additionally, CWA section 312(n)(5) provides that that the governor of any state may petition EPA and the Department of War to review any discharge determination or standard promulgated under CWA section 312(n) if there is significant new information that could reasonably result in a change to the discharge determination or standard.

The proposed collection of information is intended to capture the burden on state respondents to develop petitions, as well as the burden on EPA to review the petitions. EPA cannot require state respondents to provide additional information as part of the petition processes beyond what is enumerated in the regulations. This ICR is necessary to fulfill EPA's obligations under the statute to receive and respond to state petitions; however, development and submission of a petition by a state is not required. Instead, a state must develop and submit a petition only when the state wishes to designate an NDZ either for sewage or for an UNDS discharge, or to request a review of an UNDS discharge determination or standard.

Form Numbers: None.

Respondents/affected entities: States.

Respondent's obligation to respond:

Required to obtain or retain a benefit (CWA section 312(f)) and CWA section 312(n)).

Estimated number of respondents: 8 (total).

Frequency of response: One time.

Total estimated burden: 458 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$33,823.53 (per year), which includes \$400 annualized

capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 118.7 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The decrease is due to an adjustment to the number of expected respondents, with the EPA expecting fewer applications submitted pursuant to CWA section 312(f)(3) during this renewal cycle. The EPA increased the burden hours for some aspects of petition development based on input from consultations.

Courtney Kerwin,

Deputy Director, Data and Enterprise Programs Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NESHAP for Aluminum, Copper, and Other Non-Ferrous Foundries (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Aluminum, Copper, and Other Non-Ferrous Foundries (EPA ICR Number 2332.07, OMB Control Number 2060-0630) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through September 30, 2026. Public comments were previously requested via the **Federal Register** on August 6, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before October 26, 2026.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2021-0124, to EPA online using www.regulations.gov (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T,

1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Aiden Titel, Natural Resources Division (D230-0L), Office of Clean Air Programs, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541-4836; email address: titel.aiden@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through September 30, 2026. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on August 6, 2024 during a 60-day comment period (89 FR 63933). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Aluminum, Copper and Other Non-ferrous Metals Foundries (40 CFR Part 63, Subpart ZZZZZZ) were proposed on February 9, 2009; promulgated on June 25, 2009; and revised on September 10, 2009. These regulations apply to existing facilities and new facilities conducting melting operations located at an aluminum, copper, or other non-ferrous foundry that is an area source of hazardous air

pollutants (HAP) emissions, melts 600 tons per year (tpy) of aluminum, copper, or other non-ferrous metal or greater, and uses material that either contains or has the potential to emit HAP for which the source category was listed. New facilities include those that commenced construction, or modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR Part 63, Subpart ZZZZZZ.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Aluminum, copper and other non-ferrous metals foundries.

Respondent's obligation to respond: Mandatory (40 CFR Part 63, Subpart ZZZZZZ).

Estimated number of respondents: 318 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 11,900 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1,640,000 (per year). There are no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden.

Courtney Kerwin,

Deputy Director, Data and Enterprise Programs Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Semiconductor Manufacturing (40 CFR part 63, subpart BBBB) were proposed on May 8, 2002; promulgated on May 22, 2003; and most recently amended on July 22, 2008 and November 19, 2020. These regulations apply to existing facilities and new facilities that either emits or has the potential to emit, considering controls, in the aggregate, any single hazardous air pollutants (HAP) at a rate of 10 tons per year (tpy) or even more or any combination of HAP at a rate of 25 tpy or more. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart BBBB.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.
