

requirements of the BLM's land use planning regulations at 43 CFR 1600.

Preliminary Alternatives

Proposed Action: Lithium Nevada LLC., a subsidiary of Lithium Americas Corporation, submitted a Mining and Reclamation Plan for the Western Quarry Limestone Project to the Humboldt River Field Office of the Winnemucca District.

The Proposed Action is to construct, operate, reclaim, and close a new limestone quarry using conventional open pit mining methods. The Mining and Reclamation Plan boundary would cover approximately 874 acres of BLM-administered land, of which approximately 474 acres of surface disturbance would occur. The life of the proposed action is approximately 43 years and includes approximately six months for construction, 40 years for operation, and two years for reclamation. Mine operations would employ 78 people part-time and 16 full-time.

Existing surface disturbance associated with the previously authorized Western Quarry Limestone Notice would be overlapped by the proposed mine features within the mine area. As such, the existing disturbance would be incorporated into the proposed action.

Currently, the project boundary overlaps 872.3 acres of VRM Class II and 0.9 acres of VRM Class III adjacent to State Route 140. Under the proposed action alternative, the BLM would change the visual management classification of 872.5 acres from VRM Class II to VRM Class III, which would result in the project area to be managed entirely as VRM Class III. The change of 872.5 acres to VRM Class III would include the established objectives in the RMP.

This proposed change would require an RMP amendment to modify the direction established in the 2015 Winnemucca District RMP, adjust the VRM classifications, meet VRM objectives, and ensure that the Western Quarry Limestone Project is in conformance with the RMP.

No Action Alternative: Under the No Action alternative, the BLM would not approve the proposed Western Quarry Limestone Project and would not amend the visual management direction in the 2015 Winnemucca District RMP. Exploration activities could continue under an existing Notice that allows for up to 3.89 acres of disturbance.

The BLM welcomes comments on all preliminary alternatives as well as suggestions for additional alternatives.

Planning Criteria

The planning criteria guide the planning effort and lay the groundwork for effects analysis by identifying the preliminary issues and their analytical frameworks. Preliminary issues for the planning area have been identified by BLM personnel and from early engagement conducted for this planning effort with Federal, State, and local agencies; Tribes; and other stakeholders. The BLM has identified three preliminary issues for this planning effort's analysis. The planning criteria are available for public review and comment at the ePlanning website (see **ADDRESSES**).

Public Scoping Process

This notice of intent initiates the public scoping period and public review of the planning criteria, which guide the development and analysis of the RMP amendment and EA.

The BLM will be holding one public scoping meeting. The specific date and time of the scoping meeting will be announced at least 15 days in advance through the National NEPA register project web page <https://eplanning.blm.gov/Project-Home/?id=6D41DC2C-694D-F111-BEC6-001DD803D7D3>.

Interdisciplinary Team

The BLM will use an interdisciplinary approach to develop the RMP amendment/EA in order to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in this planning effort: air quality, botany, cultural resources, hydrology, human health and safety, lands and realty, minerals and geology, noise impacts, outdoor recreation, rangeland management, soils, sociology and economics, wildlife, and visual resources.

Additional Information

The BLM will utilize and coordinate the NEPA and land use planning processes for this planning effort to help support compliance with applicable procedural requirements under the Endangered Species Act (16 U.S.C. 1536) and Section 106 of the National Historic Preservation Act (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3), including public involvement requirements of Section 106. The information about historic and cultural resources and threatened and endangered species within the area potentially affected by the proposed RMP amendment will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian Tribal Nations on a government-to-government basis in accordance with Executive Order 13175, BLM Manual Section 1780, and other Departmental policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with Indian Tribal Nations and other stakeholders that may be interested in or affected by the proposed project that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.

SUPPLEMENTARY INFORMATION:

Scope.—For purposes of these investigations, Commerce has defined the subject merchandise as tin mill flat-rolled products that are coated or plated with tin, chromium, or chromium oxides. Flat-rolled steel products coated with tin are known as tinplate. Flat-rolled steel products coated with chromium or chromium oxides are known as tin-free steel or electrolytic chromium-coated steel. The scope includes all the noted tin mill products regardless of thickness, width, form (in coils or cut sheets), coating type (electrolytic or otherwise), edge (trimmed, untrimmed or further processed, such as scroll cut), coating thickness, surface finish, temper, coating metal (tin, chromium, chromium oxide), reduction (single- or double-reduced), and whether or not coated with a plastic material. Excluded from the scope of these investigations is certain single-reduced electrolytically chromium-coated steel tape for use as an armoring and shielding layer for fiber optic and telecommunications cables (commonly known in the industry as "copolymer coated steel tape"). Such excluded certain single-reduced electrolytically chromium-coated steel tape is excluded only if it meets all seven (7) of the below requirements:
