SUPPLEMENTARY INFORMATION:

I. Background

This information collection activity will be used to garner customer and stakeholder feedback in accordance with the Administration's commitment to improving service delivery. The feedback sought is information that provides useful insights on perceptions and opinions but are not used as statistical surveys that yield quantitative results that can be generalized to the study population. These collections will:

Provide insights into customer or stakeholder perceptions, experiences, and expectations; provide an early warning of issues with service; focus attention on areas where communication, training, or changes in operations might improve delivery of products or services; provide ongoing,

collaborative, and actionable communications between the DOL and its customers and stakeholders.

These collections will also allow feedback to contribute directly to the improvement of program management. Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population.

This type of generic clearance for feedback information will not be designed to yield reliably actionable results such as, for example, monitoring trends over time or documenting program performance. Those sorts of data usages require more rigorous designs that address: The target population to which generalizations will be made; the sampling frame; the sample design (including stratification and clustering); the precision requirements or power calculations that justify the proposed sample size; the expected response rate; methods for assessing potential nonresponse bias; the protocols for data collection; and any testing procedures that were or will be undertaken prior fielding the study.

Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative result.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.
