

- Except for information that will be included in PBGC's annual report, information gathered will be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency;

- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

- Information from qualitative surveys gathered will yield qualitative results; the collections will not be designed or expected to yield statistically reliable results or be used as though the results are generalizable to the population of interest;

- Information from quantitative surveys will be based on statistical methods and will yield quantitative results, such as satisfaction scores that can be generalized to the population.

The information collection does not include any questions of a personal or sensitive nature.

Annually, over the next three years, PBGC estimates that it will conduct three activities involving about 2,325 respondents, each of whom will provide one response. The number of respondents will vary by activity: 25 for usability testing, 50 for focus groups (5 groups of 10 respondents), and 2,250 for customer satisfaction surveys.

PBGC estimates the annual burden of this collection of information as 713 hours: 2 hours per response for usability testing (total 50 hours); 2 hours per response for focus groups (total 100 hours); and 15 minutes per response for customer satisfaction surveys (total 563 hours). No cost burden to the public is anticipated. PBGC is proposing to add additional language in its survey to make it clear that respondents should not add PII.

The existing collection of information was approved under OMB control number 1212-0066 (expires October 31, 2026). On June 5, 2026, PBGC published in the **Federal Register** a notice at 91 FR 34257 informing the public of its intent to request an extension of this collection and solicited public comment. No comments were received. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
