Abstract: Federal law—specifically Section 4 of the Archaeological Resources Protection Act of 1979 and Section 3 of the Antiquities Act of 1906—allows individuals and organizations to request permission to study, dig, or remove archaeological materials from public or Indian lands. Anyone who is not part of the National Park Service (NPS) must obtain a permit before doing any archaeological work on NPS lands, even if the work is part of another regulatory process. This includes activities such as excavation, shovel testing, coring, walking surveys (with or without collecting artifacts), underwater archaeology, photogrammetry, and documenting rock art

Researchers from universities, museums, businesses, or other organizations must submit Form DI-1926, the Application for Permit for Archeological Investigations, before starting fieldwork. Applicants must also provide a statement of work, information about their qualifications and past experience, résumés for key project staff, written consent from State or Tribal authorities when required, documentation from the facility that will care for the collections, and a detailed project schedule. State or Tribal authorities when required, authorization identifying the curation facility, and a detailed schedule of all project activities.

Once a permit is issued, permit holders must submit preliminary, annual, and final reports during the course of the project.

Abstract of Information Available

Human remains representing, at least, three individuals have been identified from Johnson County, KS (UBS 2025–02). No associated funerary objects are present.
