Abstract of Information Available

Human remains representing, at least, three individuals have been identified from Johnson County, KS (UBS 2025–02). No associated funerary objects are present. Partial remains believed to be medical specimens were found in a storage space at the Mahaffie Stagecoach Stop in 2016. Aside from a label stating, “Medical Bag Contents,” no other information is known about these remains. The remains were transferred to KSHS in 2025. Remnants of an adhesive tape are present.

Human remains representing, at least, one individual have been identified (UBS 2025–11). During consultation it was determined that a wooden club contained human hair, and not horsehair as stated in the donation record. The item is described as a club to hunt rabbits and was donated to KSHS in 1963. No other provenience information is available.

To the best of our knowledge, no hazardous substances were used to treat any of the human remains.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains described in this notice.

Determinations

The KSHS has determined that:

- The human remains described in this notice represent the physical

remains of four individuals of Native American ancestry.

- There is a connection between the human remains described in this notice and the Kaw Nation, Oklahoma.
