[Project No. 15094–002]

Ohio Power and Light, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for an original license to construct, operate, and maintain the Robert C. Byrd Locks and Dam Hydroelectric Project No. 15094 (project). The proposed 28.5-megawatt project would be located at the United States Army Corps of Engineer's (Corps) Robert C. Byrd Locks and Dam facility on the Ohio River in Mason County, West Virginia. The proposed project would affect 18.3 acres of federal land administered by the Corps. Commission staff has prepared an Environmental Assessment (EA) for the proposed project.¹

The EA contains staff's analysis of the potential environmental impacts of the proposed project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field, to access the document.
