Federal Energy Regulatory Commission

[Project No. 15094–002]

Ohio Power and Light, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for an original license to construct, operate, and maintain the Robert C. Byrd Locks and Dam Hydroelectric Project No. 15094 (project). The proposed 28.5-megawatt project would be located at the United States Army Corps of Engineer's (Corps) Robert C. Byrd Locks and Dam facility on the Ohio River in Mason County, West Virginia. The proposed project would affect 18.3 acres of federal land administered by the Corps. Commission staff has prepared an Environmental Assessment (EA) for the proposed project.¹

The EA contains staff's analysis of the potential environmental impacts of the proposed project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. Needs and Uses: The nation's communications networks provide a significant lifeline for those in need during disasters and other emergencies. Major disaster events, including Hurricane Ida, earthquakes in Puerto Rico, severe winter storms in Texas, and active hurricane and wildfire seasons, have demonstrated, however, that the United States' communications infrastructure is susceptible to disruption during disaster events. To address this issue, the Federal Communications Commission adopted a Report and Order in June 2022 to improve the reliability and resiliency of mobile wireless networks. See 87 FR 59329 (2022).

In the Report and Order, the Commission introduced the Mandatory Disaster Response Initiative (MDRI) and set forth requirements that the nation's facilities-based mobile wireless providers must take to ensure their

compliance the MDRI. Pursuant to the MDRI, these providers must take action related to roaming with other providers, mutual aid agreements, municipal preparedness and restoration and consumer readiness and preparation. These providers must also submit reports to the Commission detailing the timing, duration, and effectiveness of their implementation of the MDRI's provisions on request, perform annual testing of their roaming capabilities and related coordination processes, and issue written denials of roaming requests, among other requirements.

The Commission submits this request to extend the information collection, which seeks to continue collecting information described in the Report and Order, to support its adoption of the MDRI. The collected information is and will be used by the Commission, consumers and consumer groups, service providers to realize significant public safety benefits. For example, consumers and consumer groups use the information to increase consumer education and improve consumer preparedness for disasters and other emergencies. Further, providers use the information to ensure that roaming will work expeditiously in times of emergencies and to better understand their network capabilities related to roaming and ensure their networks roam as effectively as possible when a disaster strikes. Further, the Commission uses information as a basis for potential future improvements to the MDRI and other programs in furtherance of public safety, including by gauging providers' compliance with the MDRI's roaming provision, ensuring accountability by providers who fail to comply and for resolving disputes related to roaming agreements. Thus, the information sought in this collection is necessary and vital to ensuring that the MDRI is effective at protecting the life and property of the public.

Federal Communications Commission.
