Phosphatidylcholine in Pesticide Formulations; Exemption From the Requirement for a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of phosphatidylcholine (CAS Reg. No. 97281–47–5) when used as an inert ingredient (adjuvant/carrier) in pesticide contraceptive formulations applied to cervid, porcine, raccoon, and bovine. Compliance Services International on behalf of SpayVac-for-Wildlife, Inc., submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting establishment of an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of phosphatidylcholine, when used in accordance with the terms of that exemption.

DATES: This regulation is effective October 2, 2026. Objections and requests for hearings must be received on or before December 1, 2026 and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of this document).
