SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

Title: Safety Standard for Button Cell or Coin Batteries and Consumer Products Containing Such Batteries.

OMB Number: 3041–0195.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of packages of button cell and coin batteries; and manufacturers and importers of non-children's products that contain or are designed to use button cell or coin batteries.

General Description of Collection: Based on the requirements in Reese's Law, 15 U.S.C. 2056e(a) and (b), the Safety Standard for Button Cell or Coin Batteries and Consumer Products Containing Such Batteries, 16 CFR part 1263, prescribes performance and labeling requirements for child-resistant battery compartments on children's and non-children's consumer products that contain or are designed to use button cell or coin batteries. These performance and labeling requirements are intended to reduce or eliminate injuries and deaths associated with children 6 years old and younger ingesting these batteries. The labeling requirements

include warning labels for packaging of consumer products containing button cell or coin batteries and for any literature, such as instructions or user manuals, accompanying these consumer products. The standard also includes warning label requirements for packaging of button cell or coin batteries, including button cell or coin batteries packaged separately with a consumer product.

Estimated Number of Respondents: CPSC estimates that there are 15,363 entities that will respond to the collection annually.

Estimated Time per Response: CPSC estimates that on average each entity will respond three times per year. While the time per response will vary depending on the business and their practices, CPSC estimates two hours for labeling and two hours for recordkeeping, on average.

Total Estimated Annual Burden: The total estimated burden of the collection is 184,356 hours (4 hours × 3 × 15,363 = 184,356), annually.

Total Estimated Annual Cost to Respondents: The hourly compensation for all private industry workers in goods-producing industries is \$48.97 per hour (U.S. Bureau of Labor Statistics, "Employer Costs for Employee Compensation," total compensation for private industry workers in goods producing industries, December 2025: https://www.bls.gov/news.release/archives/eccec_03202026.htm). At this rate, the annualized cost the total estimated annual cost of the collection of information is approximately \$9 million annually (184,356 hours × \$48.97 = \$9,027,913.32).

Response to Public Comments:

CPSC received three public comments on its proposed extension of this information collection. One out of scope comment, addressing the requirements of the final rule and of the relevant voluntary standards, was submitted by the People's Republic of China, pursuant to the Article 2.9.4 of the WTO/TBT Agreement. The other two comments, submitted by the Information Technology Industry Council (ITI) and an anonymous commenter, discussed burden estimates for labeling, among other concerns related to out-of-scope issues. Summaries of and responses to these comments are provided below.

Comments: ITI commented that the burden is underestimated and does not reflect real-world complexity, such as lifecycle documentation (not a one-time effort), global model and packaging complexity, and cross functional coordination. ITI asserted that
