ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2021–0669; FRL–9116–09–OAR]

Phasedown of Hydrofluorocarbons: Notice of 2027 Allowance Allocations for Production and Consumption of Regulated Substances Under the American Innovation and Manufacturing Act of 2020, and Notice of Final Actions Establishing Administrative Consequences

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has issued calendar year 2027 allowances for the production and consumption of hydrofluorocarbons in accordance with the Agency’s regulations. This issuance of allowances is undertaken pursuant to the American Innovation and Manufacturing (AIM) Act, which directs the EPA by October

1 of each calendar year to determine the quantity of production and consumption allowances for the following calendar year. In this notice, the EPA is also providing notice of separate Agency actions taken to establish administrative consequences for specific entities. These finalized actions withheld or revoked the identified entities’ newly issued calendar year 2027 allowances in accordance with the administrative consequence regulatory provisions.

FOR FURTHER INFORMATION CONTACT:

Connor Henderson, Chemicals, Coatings, and Products Division, Office of Clean Air Programs, Mail Code 6205A, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–2177; email address: henderson.connor@epa.gov. You may also visit the EPA’s website at <https://www.epa.gov/hfcs> for further information.

SUPPLEMENTARY INFORMATION:

Subsection (e)(2)(D)(i) of the American Innovation and Manufacturing Act of 2020 (AIM Act) directs the Environmental Protection Agency (EPA) to determine, by October 1 of each calendar year, the quantity of allowances for the production and consumption of regulated substances that may be used for the following calendar year. The EPA has codified the production and consumption baselines and phasedown schedules for regulated substances in 40 CFR 84.7. Under the phasedown schedule, for 2027, total production allowances may not exceed 229,521,263 metric tons of exchange value equivalent (MTEVe) and total consumption allowances may not exceed 181,522,990 MTEVe.

The EPA regulations at 40 CFR part 84, subpart A, outline the process by which the Agency determines the number of allowances each entity is allocated. The EPA allocated allowances for 2027 consistent with the regulatory requirements and has posted entity-specific allowance allocations on its website. An allowance allocated under the AIM Act does not constitute a property right and is a limited authorization for the production or consumption of a regulated substance. The EPA also tracks information on how those allowances are used. Reported information for calendar year 2025 HFC activity, including how many allowances were used and total U.S. production and consumption of HFCs in 2025, can be found on EPA’s HFC Data Hub web page. Both allowance allocations and the HFC Data Hub can
