these two rates; (3) if either the producer
or the exporter, but not both, of the
subject merchandise has a company-
specific estimated subsidy rate assigned,

SUPPLEMENTARY INFORMATION:**Background**

On June 3, 2026, Commerce published in the *Federal Register* the *Preliminary Results* of this administrative review and invited interested parties to comment.¹ The deadline for these final results is October 1, 2026.

For a complete description of the events since the *Preliminary Results*, see the Issues and Decision Memorandum.² The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), which is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/frnotices>.

Commerce conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order³

The merchandise subject to the *Order* is circular welded carbon-quality steel pipe from the United Arab Emirates. For a complete description of the scope of the *Order*, see the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs submitted by interested parties are addressed in the Issues and Decision Memorandum and listed in the appendix to this notice.

Changes Since the Preliminary Results

Based on our analysis of the comments received from interested parties regarding the *Preliminary Results*, we made certain changes to the weighted-average dumping margin calculations for THL Tube and Pipe Industries LLC; KHK Scaffolding and Formwork LLC; and Universal Tube and Pipe Industries FZE (collectively, Universal).⁴ For a discussion of these changes, see the Issues and Decision Memorandum.

Rates for the Non-Individually Examined Companies

The Act does not address the establishment of a rate to be applied to companies not selected for individual

examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. However, 19 CFR 351.109(g) states that Commerce will determine the rate for non-selected companies by applying the methodology set forth in 19 CFR 351.109(f)(1)–(2), which generally parallels the methodology for determining the all-others rate in an investigation under section 735(c)(5) of the Act. Under 19 CFR 351.109(f)(1) and section 735(c)(5)(A) of the Act, the all-others rate is normally “an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely {on the basis of facts available}.”

In this administrative review, we calculated weighted-average dumping margins for the individually investigated respondents, Conares Metal Supply Limited (Conares) and Universal, that are not zero, *de minimis*, or based entirely on facts otherwise available. Accordingly, we are assigning to the companies under review that were not selected for individual examination a weighted-average dumping margin equal to the weighted average of the estimated weighted-average dumping margins calculated for Conares and Universal, weighted by the mandatory respondents' publicly ranged total sales values, consistent with the guidance in section 735(c)(5)(A) of the Act.⁵

Final Results of Review

Commerce determines that the following estimated weighted-average dumping margins exist for the period December 1, 2023, through November 30, 2024:

¹ See *Circular Welded Carbon-Quality Steel Pipe from the United Arab Emirates: Preliminary Results of Antidumping Duty Administrative Review; 2023–2024*, 91 FR 33142 (June 3, 2026) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

² See Memorandum, “Issues and Decision Memorandum for the Final Results of the Administrative Review of the Antidumping Duty Order on Circular Welded Carbon-Quality Steel Pipe from United Arab Emirates; 2023–2024,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

³ See *Circular Welded Carbon-Quality Steel Pipe from the Sultanate of Oman, Pakistan, and the*

United Arab Emirates: Amended Final Affirmative Antidumping Duty Determination and Antidumping Duty Orders, 81 FR 91906 (December 19, 2016) (*Order*).

⁴ See Issues and Decision Memorandum.

⁵ With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the dumping margins calculated for the examined respondents; (B) a simple average of the dumping margins calculated for the examined respondents; and (C) a weighted-average of the dumping margins calculated for the examined respondents using each company's publicly ranged U.S. sale quantities for the merchandise under consideration. Commerce then compares (B) and (C)

to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. See, e.g., *Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part*, 75 FR 53661, 53663 (September 1, 2010); see also Memorandum, “Calculation of the Preliminary Weighted-Average Dumping Margin for the Companies Not Selected for Individual Examination,” dated concurrently with this notice.
