Farm Service Agency

Title: Farm Loan Program, General Program Administration.

OMB Control Number: 0560–0238.

Summary of Collection: Farm Loan Program (FLP) in the Farm Service Agency provides loans to family farmers to purchase real estate and equipment and finance agricultural production to comply the regulation of 7 CFR part 761, General Program Administration.

Need and Use of the Information: Information collections are submitted by applicants and borrowers to the local FSA office serving the county in which their business is headquartered. The information is necessary to provide supervised credit as legislatively mandated and is used by FSA to:

- Ensure that when loan funds or insurance proceeds are used for construction and development projects, work is completed according to applicable State and local requirements, and in a manner that protects the Government's financial interest.
- Ensure that the loan repayment plan is developed using realistic data, based on the operation's actual history and any planned improvements.

- Identify potential concerns limiting the success of the operation and develop a loan assessment outlining the course of action to be followed, to improve the operation so that commercial credit is available.

The general nature of a loan from FSA is very similar to that of any conventional commercial creditor. However, FSA applicants and borrowers tend to pose more of an economic risk of loss than those operations financed by commercial credit sources, as applicants must document that no other source of credit is available at the time of application. Legislation requires FSA to actively supervise these borrowers and provide credit counseling, management advice, and financial guidance. Also, FLP provides either a prompt payment or standard guarantee plan to sellers who enter a land contract with a beginning or socially disadvantaged farmers to comply with the regulation of 7 CFR part 763, Land Contract Guarantee Loan but have not received any requests for land contract.

FLP is mandated to provide supervised credit; therefore, failure to collect the information, or collecting it less frequently, could result in the failure of the farm operation or loss of agency security property.

Description of Respondents: Business or other for-profit; farms.

Number of Respondents: 66,041.

Frequency of Responses: Reporting: On occasion; annually.

Total Burden Hours: 158,263.
