SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative

Abstract of Information Available

Based on the information available, human remains representing, at least, 26 individuals have been reasonably identified and were removed from the Karow (47-WN-0057/BWN-0191) and Cowling Cemetery (47-WN-0198/BWN-0157) sites, Winnebago County, WI. The Karow site was excavated in 1975 by Dr. Alaric Faulkner, Assistant Professor at Wisconsin State College-Oshkosh (now UWO) from 1972 to 1978, as a salvage excavation after human remains were disturbed while digging a residential basement. In 1984, in anticipation of house construction, Dr. Victoria Dirst, Assistant Professor at UWO from 1978 to 1985, excavated an area at Karow. The late Dr. Clarence (Charles) J. Schneider was an avocational archaeologist, active during the 1930s–1980s. His collection was donated to the University of Wisconsin Oshkosh (UWO) in 1993. Some items were identified as having been removed from Karow (47-WN-0057) (UWO Accession: 47WN0057_SCHNEI01). In 1979, Dr. Victoria Dirst was called to investigate burials that were found at Cowling Cemetery (47-WN-0198) during the construction of a boat ramp. The 284 associated funerary objects are 10 lots of bone artifacts; one lot of bullet casing; one lot of burnt maize; 76 lots of ceramics; 83 lots of faunal remains; 14 lots of floral remains; two lots of glass; one lot of ground stone personal ornamentation; two lots of iron nails; 78 lots of lithics; one lot of missing lithic; one lot of modified shell; one lot of post-contact artifact; six lots of pre-contact copper artifact; one lot of sheet metal; one lot shell pendant; and five lots soil samples. UWO has no knowledge or record of any potentially hazardous substances used to treat the human remains or associated funerary objects.

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location of the human remains and associated funerary objects described in this notice.

Abstract of Information Available

A total of 17 cultural items have been requested for repatriation (UBS 2023–22). The 17 unassociated funerary objects include a metal projectile point, an iron hatchet head, stones, a pair of shears, iron scrapers, a tin cup, a copper ornament, a lance head, and animal bones. The catalog description states the items are “relics found on the site of Chivington's Indian Massacre, Sand Creek . . . December 9, 1864, collected by E. Powell, Granaries, CO.” They were

donated to KSHS in 1882 by Joseph Savage.

A total of one cultural item has been requested for repatriation (UBS 2023–26). The one unassociated funerary object is a wooden burl described as an Indian doll head that was found at the Sand Creek Massacre site in Colorado. The item was donated to KSHS in 1972 by Dr. O.H. Simpson on behalf of an anonymous donor. An unspecified glue and cloth remain on the shoulders.

To our knowledge, no known hazardous substances were used on any of the funerary objects.

Determinations

The KSHS has determined that:

The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.

- There is a connection between the cultural items described in this notice and the Cheyenne and Arapaho Tribes, Oklahoma; Northern Arapaho Tribe of the Wind River Reservation, Wyoming; and the Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana.

Repatriation of the cultural items in this notice to a requestor may occur on or after November 9, 2026. If competing requests for repatriation are received, the KSHS must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are
