Total Annual Costs: \$1,958,335.

Needs and Uses: The Commission will submit this extension of a currently approved information collection to the Office of Management and Budget (OMB) after this 60-day comment period in order to obtain the full three-year clearance.

This information collection is a result of responsibility placed on the FCC by the Telecommunications Act of 1996 and the National Environmental Policy Act (NEPA) of 1969. The Telecommunications Act directs the FCC to “prescribe and make effective rules regarding the environmental effects of radio frequency emissions,” and NEPA requires that each federal agency evaluate the impact of “major actions significantly affecting the quality of the human environment.” It is the FCC’s opinion that this is the most efficient and reasonable method of complying with the Telecommunications Act and NEPA with regard to the environmental issue of radiofrequency radiation from FCC-regulated transmitters.
