III. Discussion

The NRC is issuing the draft EIS for public comment. The draft EIS includes the evaluation of the environmental impacts of the proposed action of issuing a COL that would allow the construction of PMN Units 1–4, as well as the environmental impacts of the no-action alternative. In the draft EIS, after weighing the environmental, economic, technical, and other benefits against environmental and other costs, and considering reasonable alternatives, the preliminary recommendation is that the NRC issue the requested COL to Fermi America contingent upon successful completion of the safety review and unless safety issues mandate otherwise. The NRC staff based its preliminary recommendation on the NRC staff's independent environmental review, the NRC staff's assessment of the applicant-prepared EIS, the NRC staff's consultation with Federal, State, and local agencies and Indian Tribes, and the NRC staff's consideration of public comments received during the scoping process.
