Kingdom of Saudi Arabia—AGT-1500 Engines

The Kingdom of Saudi Arabia has requested to buy sixty (60) AGT-1500 tank engines. The following non-major defense equipment items will also be included: AGT-1500 containers; spare parts, consumables, and accessories; contractor logistics support; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$750 million.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a partner country that is a force for political stability and economic progress in the Gulf Region.

The proposed sale will improve Saudi Arabia's capability to meet current and future threats by bolstering its readiness, its ability to support operational requirements, and contributing to capabilities necessary to achieve improved interoperability and execution of bilateral contingency plans. The Kingdom of Saudi Arabia will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Honeywell, located in Anniston Army
