II. Discussion

Pursuant to section 50.75 of title 10 of the *Code of Federal Regulations* (10 CFR), “Reporting and recordkeeping for decommissioning planning,” the NRC requires nuclear power reactor licensees to adjust annually, in current year dollars, their estimate of the cost to decommission their plants. The annual updates are part of the process for providing reasonable assurance that adequate funds for decommissioning will be available when needed.

Revision 21 of NUREG–1307, “Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities,” modifies the previous revision to this report issued in February 2025 (ADAMS Accession No. ML25037A226) and incorporates updates to the labor, energy, and waste burial escalation factors of the NRC minimum

decommissioning fund formula. Due to the inclusion of disposal costs for low activity waste (a subset of low-level waste), unchanged low-level waste (LLW) burial charges at two of the nation’s four LLW disposal facilities to which a majority of licensees are anticipated to dispose some portion of their LLW, and slightly to moderately higher charges at the remaining two facilities to which a small number of licensees are anticipated to dispose of their LLW, the minimum decommissioning fund formula amounts calculated by licensees, based on revised LLW burial factors presented in this report, will generally reflect minimum decommissioning fund requirements that are lower, on average, when compared to those previously reported by licensees in 2025.
