SUPPLEMENTARY INFORMATION:

History

The FAA published a final rule for Docket No. FAA-2026-8548 in the **Federal Register** (91 FR 59987; September 22, 2026), establishing Class E airspace at OSF St Elizabeth Medical Center Heliport, Ottawa, IL. After publication of the final rule, an FAA database review noted that the incorrect heliport (OSF St Francis Medical Center Heliport) was used in the legal description. This action replaces the incorrect heliport with the correct heliport, OSF St Elizabeth Medical Center Heliport. This correction represents a ministerial change. It does not change the airspace dimensions or operating requirements. Accordingly, the FAA finds good cause that recirculating the NPRM for notice and comment is unnecessary.

Correction of Final Rule

Accordingly, pursuant to the authority delegated to me, the final rule for Docket No. FAA-2026-8548, as published in the **Federal Register** on September 22, 2026 (91 FR 59987; FR Doc. 2026-19391), is corrected as follows:

On page 59988, in the third column, amend Paragraph 6005 “Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.” by revising the legal description for “AGL IL E5 Ottawa, IL” to read as follows:

AGL IL E5 Ottawa, IL [Establish]

OSF St Elizabeth Medical Center Heliport, IL
 (Lat. 41°21’30” N, long 88°49’30” W)

That airspace extending upward from 700 feet above the surface within a 6.8-mile radius of the OSF St Elizabeth Medical Center Heliport.

Voluntary Consensus Standards Update; Formaldehyde Emission Standards for Composite Wood Products

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is publishing a final rule to update the incorporation by reference of several voluntary consensus standards in the Agency’s formaldehyde standards for composite wood products regulations under the Toxic Substances Control Act (TSCA) due to the standards having been updated or superseded by the issuing organizations. These new standards primarily update test methods and product standards concerning composite wood products that use formaldehyde. EPA is also conforming these updated standards in the scope and definitional sections in the final rule and incorporating by reference a new small scale quality control chamber test method, similar to current methods

already incorporated by reference. EPA is also removing one standard that was previously incorporated by reference to avoid redundancy, given that another identical, internationally recognized version of the standard is already incorporated by reference in this rule.

DATES: This final rule is effective on November 27, 2026. The incorporation by reference of certain material listed in the rule is approved by the Director of the Federal Register as of November 27, 2026. The incorporation by reference of certain other material listed in the rule was approved by the Director of the Federal Register as of February 10, 2017, February 7, 2018, August 21, 2019, and March 23, 2023.

ADDRESSES: The docket for this action is identified by docket identification (ID) number EPA–HQ–OPPT–2017–0245, using the Federal eRulemaking Portal at <https://www.regulations.gov>.
