Abstract: The SAFER SKIES Act, Title LXXXVI of the National Defense Authorization Act for Fiscal Year 2026, as implemented by the interim final rule codified at 6 CFR part 124 and 28 CFR part 124, extends counter-UAS detection and mitigation authority to State, local, tribal, and territorial (SLTT) law enforcement and correctional agencies under 6 U.S.C. 124n(a)(2). This collection covers the coordination, authorization, reporting, and recordkeeping submissions the rule requires, made through the designated Federal C–UAS coordination portal. The current approval was granted on an emergency basis and expires November 30, 2026. This revision requests a standard three-year approval, reflects revisions to five instruments (C–UAS–AN, C–UAS–OPLAN, C–UAS–TTE, C–UAS–ATT, and C–UAS–POR) made during initial implementation, and re-estimates burden for every instrument. The FBI received one public comment in response to the 60-day notice, from an independent researcher. The commenter supported the collection and raised questions about the cost burden, the basis for the recordkeeping and plan estimates, the treatment of filed forms under the retention provisions of 6 CFR and 28 CFR 124.14, access to the instruments, and opportunities to reduce burden through data reuse and machine-readable filing. In response, the FBI has added a one-time form training line to the burden table, split the recordkeeping estimate by agency tier and raised the mitigation-tier figure, documented the task-level basis for each estimate in the supporting statement, explained the basis for the cost estimate, provided the instruments to the commenter, and committed to adding a State-law citation field to the Extended Retention Notification, publishing the data schema for each instrument, extending data reuse to the Post-Operation Report and Semiannual Summary, and offering a one-step no-activity summary for detection-tier agencies. The comment and the FBI's response are summarized in the supporting statement. The FBI is transitioning the instruments from the current offline, emailed workflow to a secure web portal that will host the same instruments with the same data elements, authenticate users through existing federated identity providers, and capture completion timing for future burden estimates; go-live is expected in the second or third quarter of fiscal year 2027. Following publication of the 60-day notice, the FBI also made minor clarifying edits to the instruments; those edits did not add or remove data elements.
