require access. Access to electronic records is controlled by the organization's Personal Identify Verification (PIV) cards or multi-factor authentication and/or other network access or security controls. Role-based access is used to restrict access, and the organization employs the principle of least privilege, allowing only authorized users with access necessary to accomplish assigned tasks in accordance with organizational missions and business functions.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by employee's name or title.

POLICIES AND PRACTICSE FOR RETENTION AND DISPOSAL OF RECORDS:

The retention schedule is located within the FERC Comprehensive Records Schedule, Part IV, Item 2—COMMISSION PUBLICATIONS. This section is designed to address official publications that are formally coordinated, prepared, and printed by the Government Printing Office, private contractors, or directly by the agency. It also encompasses special reports, studies, brochures, pamphlets, handbooks, manuals, catalogs, and other materials prepared for public relations and educational purposes, all intended to inform or promote agency programs and operations to the public. For records of this nature, the official record copies are classified as permanent. These permanent records will be transferred to NARA for long-term preservation, ensuring their continued availability and historical value.

ADMINISTRACTIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

See Policies and Practices for Storage of Records.

[Project No. 2538–106]

Erie Boulevard Hydropower, L.P.; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff reviewed Erie Boulevard Hydropower, L.P.'s, application for its Beebee Island Project No. 2538 proposing to remove the remaining conventional wooden flashboard system and replace it with a pneumatic flashboard system, and for a temporary variance from the requirements of license Articles 401, 411, and 414 for 12 weeks to allow for a 1.0-foot reservoir drawdown, reduced fish attraction flows, and a suspension of veiling flow requirements, respectively, and have prepared an Environmental Assessment (EA) for the project.[1] The project is located on the Black River in the town of Watertown, in Jefferson County, New York. The project does not occupy federal lands.

The EA contains Commission staff's analysis of the potential environmental effects of the proposed replacement of the conventional wooden flashboard system with a pneumatic flashboard system and alternatives to the proposed action, and concludes that the proposed action would not constitute a major federal action that would significantly affect the quality of the human environment.

The EA may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary Search Form'' link. Enter the docket number (P–2538–106) in the docket number field to access the document.
