We invite you to comment on the proposed information collections.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13), we invite the public and other Federal agencies to comment on proposed information collections. We published a notice of proposed collection for these information collections on August 12, 2026 (91 FR 52085) and we received no comments. In the 60-day notice the respondents and burden hours were represented for three years. We've corrected those figures in this notice with the actual annual respondents and burden hours. We are therefore submitting the described information collections to OMB for approval.

If you have comments or suggestions, they should address one or more of the following points: (a) whether the proposed information collections are necessary for NARA to properly perform its functions; (b) our estimate of the burden of the proposed information collections and its accuracy; (c) ways we could enhance the quality, utility, and clarity of the information we collect; (d) ways we could minimize the burden on respondents of collecting the information, including through information technology; and (e) whether these collections affect small businesses.

In this notice, we solicit comments concerning the following information collection:

II. Introduction

The NRC is considering issuance of an amendment to Renewed Facility Operating License No. NPF–6, issued to Entergy, for operation of ANO–2, located in Pope County, Arkansas.

The proposed amendment would revise the technical specifications for ANO–2 by modifying the note associated with SR 4.1.3.1.2 to permit CEA 29 to be excluded from exercising for the remainder of Cycle 32. This change would allow CEA 29 to remain out of the exercising surveillance until the planned refueling outage 2R32, currently scheduled for September 2027.

Pursuant to the requirements of sections 50.91 and 50.92 of title 10 of the *Code of Federal Regulations* (10 CFR), the licensee requested approval of the amendment under exigent circumstances. In its application, the licensee explained that it submitted this application under exigent circumstances due to the need for NRC review and, if pertinent requirements are met, approval of the amendment before the next required surveillance date, scheduled for December 16, 2026, to avoid a required plant shutdown and to prevent an unnecessary transient or reactivity excursion while deferring CEA 29 repair until the planned refueling outage 2R32.

Before any issuance of the proposed license amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended (the Act), and NRC's regulations.

Pursuant to 10 CFR 50.91(a)(6), for amendments to be granted under exigent circumstances, the NRC has made a proposed determination that the license amendment request involves no significant hazards consideration (NSHC). Under the NRC's regulations in 10 CFR 50.92, this means that operation
