to allow additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until December 7, 2026. Submissions received after the deadline for receiving comments may not be considered.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

FOR FURTHER INFORMATION CONTACT: If additional information is required contact: Anais Azoulay, 202–704–5829, *anais.azoulay@cisa.dhs.gov*.

SUPPLEMENTARY INFORMATION: The Department of Homeland Security (DHS) Cybersecurity and Infrastructure Security Agency (CISA) Emergency Communications Division (ECD), formed under Title XVIII of the Homeland Security Act of 2002, 6 U.S.C. 571 *et seq.,* as amended, is required, pursuant to 6 U.S.C. 571(c)(5) to conduct extensive, nationwide outreach and foster the development of interoperable emergency communications capabilities by state, regional, local, and tribal governments and public safety agencies, and by regional consortia thereof. To achieve this, ECD provides the communications assets and survey mapping (CASM) tool. The CASM tool is the primary resource nationwide for the emergency communications community to inventory and share asset and training information for the purpose of planning public safety communications operability and interoperability.

ECD provides the communications assets survey and mapping (CASM) tool as a secure and free nationwide database to contain communications capabilities for use by federal, state, local, territorial, and tribal (SLTT) emergency personnel. CASM allows federal employees and SLTT statewide interoperability coordinators (SWIC) to inventory emergency communication equipment and resources. The information entered is voluntary and used by SWIC to support tactical planning and coordination during emergencies. ECD does not utilize the information entered into CASM. ECD only provides, maintains, and stores the information entered in the CASM database and only has administrative access to the information entered.

CASM Registration

To get access to the CASM tool, users click on the ''request new access'' link on the CASM login page (*https://login.CASM.cisa.dhs.gov/*). The registration requires that users enter their name, contact information, reason for their access request, type of data to access, and access level. Once entered, the access request is routed to their organization's approving authority. Once the organization's approving authority vets and authorizes the access request, the user account is automatically created, and users are notified via an auto-generated email.

CASM Modules

The CASM consists of voluntary modules related to the different types of capabilities. There is a module for assets, which contains information about emergency equipment, the equipment capabilities and location. There is a personnel module, which contains personnel name, contact information and information about their communications unit (COMU) training. The personnel module allows SWICs to track their personnel's COMU training.

All information is collected via electronic means. The CASM registration and database tool is available online via *https://login.CASM.cisa.dhs.gov/*. Users can also access and enter information via the CASM resource finder mobile app.

This information collection does not impact small businesses or other small entities.

This database allows ECD to execute its statutory authority under 6 U.S.C. 571 to conduct extensive, nationwide outreach to support and promote the ability of emergency response providers and relevant government officials to continue to communicate in the event of natural disasters, acts of terrorism, and other man-made disasters. Without CASM and the federal government's ability to empower the states, ECD would not have an organic way for states to create a centralized and secure emergency assets and equipment database. Information is protected by the Privacy Act of 1974 and is kept private or anonymous to the extent allowable by law.

The DHS Privacy Office review finds that this is a privacy sensitive collection requiring a privacy impact assessment (PIA) and system of records notice (SORN). The collection is covered by PIA—DHS/ALL/PIA–006 DHS general contacts list and SORN—DHS/ALL–002 DHS mailing and other lists system, 73 FR 71659 (NOV 25, 2008) and SORN—DHS/ALL–004 general information technology access account records system (GITAARS), 77 FR 70792 (NOV. 27, 2012).

This is an extension of a currently approved collection without change.

Analysis

Agency: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

Title: Communications Assets Survey and Mapping (CASM) Tool Registration Form.

OMB Number: 1670–0043.

Frequency: Annually.

Affected Public: Emergency Communication Personnel.

Number of Respondents: 56 Annually.

Estimated Time per Respondent: 0.08 hours (5 minutes) per Registration, 0.5 Hours (30 Minutes) per Module.

Total Burden Hours: 341 Hours Annually.

Total Annual Burden Cost: $19,981.

Total Annual Government Burden Cost: $3,000,000.

Winfield P. Werntz,

Acting Chief Information Officer, Department of Homeland Security, Cybersecurity and Infrastructure Security Agency.

BILLING CODE 9111–LF–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. CISA–2026–0265]

Agency Information Collection Activities: Incident Communications Activity Report

AGENCY: Cybersecurity and Infrastructure Security Agency (CISA),

Department of Homeland Security (DHS).

ACTION: 60-Day notice and request for comments; extension of a previously approved collection.

SUMMARY: The Emergency Communications Division (ECD) within Cybersecurity and Infrastructure Security Agency (CISA) submits the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance.

DATES: Comments are encouraged and will be accepted until January 5, 2027. Submissions received after the deadline for receiving comments may not be considered.

ADDRESSES: You may submit comments, identified by docket number Docket # CISA–2026–0265, by following the instructions below for submitting comment via the Federal eRulemaking Portal at *http://www.regulations.gov.*

Instructions: All comments received must include the agency name and docket number Docket #CISA–2026–0265. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Kylie-Anne Noreiga at 202–329–5161 or at *kylie-anne.noreiga@cisa.dhs.gov*.

SUPPLEMENTARY INFORMATION: The Cybersecurity and Infrastructure Security Agency (CISA) Emergency Communications Division (ECD) is mandated by The Cybersecurity and Infrastructure Security Act of 2018, 6 U.S.C. 652(f) under Sections (9) carry out emergency communications responsibilities, in accordance with subchapter XIII; (10) carry out cybersecurity, infrastructure security, and emergency communications stakeholder outreach and engagement and coordinate that outreach and engagement with critical infrastructure Sector Risk Management Agencies, as appropriate; and (11) provide education, training, and capacity development to Federal and non-Federal entities to enhance the security and resiliency of domestic and global cybersecurity and infrastructure security.

This information collection is requested to be completed by ECD stakeholders, including state and local emergency communications professionals—through The Incident Communications Activity Report (ICAR) form. The ICAR was developed with the intention of capturing and documenting the emergency communications activity and utilization of public safety communications technologies controlled by state or local emergency response officials organized to provide command and coordination for an incident, planned event, or exercise. As a result, CISA/ECD seeks to renew a standard request from the Paper Reduction Act (PRA) to review, analyze, and revise current Incident Communication Activity.

The Emergency Communications Division (ECD) is a division within the Cybersecurity and Infrastructure Security Agency (CISA) which serves under the direction of the Department of Homeland Security (DHS). ECD coordinates with National Security and Emergency Preparedness (NS/EP) communications stakeholders to enable use of technical assistance and information sharing to reduce communications system impacts or vulnerabilities. CISA has authority to perform assessments and evaluations for federal and non-federal entities, with consent and upon request. CISA responds to 6 U.S.C. 571(c) to enhance interoperable communications capabilities, training, planning, and implementation across federal, state, local, tribal, and territorial (FSLTT) entities and critical infrastructure key resources. The information collected will provide on-the-ground data on emergency communications activity and utilization of public safety communications technologies controlled by state or local emergency response officials organized to provide command and coordination for an incident, planned event, or exercise. The information captured focuses on several key areas: incident complexity, command and coordination systems, and all-hazards information and communications technology positions, resources (*e.g.,* voice and data systems, interoperability techniques, and planning references), challenges and general conditions encountered during the incident.

ICAR will be submitted electronically by the emergency responder with overall information and communications technology responsibilities within the identified command and coordination organization, for a reporting period.

This information will inform other jurisdictions on best practices while permitting data-driven decisions on future policy improvements. CISA, in support of the National Council of Statewide Interoperability Coordinators (NCSWIC) and the CISA interoperable-communications program known as SAFECOM, will collect data through a two-page report to capture the emergency communications activity and utilization of public safety communications technologies controlled by state or local emergency response officials organized to provide command and coordination for an incident, planned event, or exercise. CISA's goal is to identify lessons learned to drive strategy and improve existing or offer new technical assistance within the scope of emergency communications activity for Incidents, Planned Events, or Exercises. The ICAR is completed by the person with overall information and communications technology responsibilities with the identified command and coordination organization, for the indicated reporting period. The reporting period is flexible to meet agency or jurisdictional program needs. The report is designed to accommodate a single report for the incident or event duration, or multiple reports for smaller time periods within the same incident or event. State, local, territorial, or tribal incident communications, organizational and technical challenges and best practices will be captured. Collecting and summarizing this data will drive our nationwide response, drive strategy, and goal development subsequently improving existing and/or offer new Technical Assistance options to stakeholders.

The ICAR is an electronically submitted form to populate the data sets which will be loaded, stored, and analyzed in the division's data analytics system. Electronic data collection enables an efficient and straightforward submission process to submit, reducing the time and effort for the submitter while also reducing errors.

ICAR form is voluntarily submitted using a Microsoft Teams Form link. The ICAR form will require a total effort of approximately five minutes for completion. The ICAR form will be completed per incident. Leveraging the MS Forms and a fillable PDF there will be no printing of forms needed, no preparing and sending emails or memos per incident. Participants will be able to input free form information in addition to drop down type questions.

The current existing collection approved by OMB is set to expire on December 31, 2026.

There are no changes to the burden or information being collected.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Analysis

Agency: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

Title: Incident Communications Activity Report (ICAR).

OMB Number: 1670–0050.

Frequency: Annually.

Affected Public: State, Local, Territorial and Tribal; Public Safety Communications Personnel.

Number of Respondents: 450.

Estimated Time per Respondent: 0.083 hours (5 minutes).

Total Burden Hours: 37.5 hours.

Total Annual Burden Cost: $2,474.61.

Total Annual Government Burden Cost: $27,887.79.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NRNHL–DTS#–44163; PPWOCRADI0, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before October 24, 2026, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by November 23, 2026.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line ''Public Comment on <property or proposed district name, (County) State>.'' If you have no access to email, you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 2013, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sherry A. Frear, Chief, National Register of Historic Places/National Historic Landmarks Program, 1849 C Street NW, MS 2013, Washington, DC 20240, *sherry_frear@nps.gov,* 202–913–3763.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before October 24, 2026. Pursuant to 36 CFR 60.13, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Nominations submitted by State or Tribal Historic Preservation Officers.
