DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Noise Compatibility Program for Seattle-Tacoma International Airport, King County, Washington

AGENCY: Federal Aviation Administration, DOT.

ACTION: Acceptance of Seattle-Tacoma International Airport noise exposure map.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by the Port of Seattle for Seattle-Tacoma International Airport are compliant with applicable statutory and regulatory requirements.

DATES: The effective date of the FAA's determination on the noise exposure map is October 26, 2026.

FOR FURTHER INFORMATION CONTACT: Sky M. Laron, Community Engagement Officer, Northwest Mountain Region, Airports Division, Federal Aviation Administration, 2200 S. 216th Street, Des Moines, WA 98198, (206) 231–4136.

SUPPLEMENTARY INFORMATION: The FAA determined the noise exposure map submitted by the Port of Seattle for Seattle-Tacoma International Airport, is in compliance with applicable statutory and regulatory requirements, effective October 26, 2026 Under title 49, United States Code (U.S.C.) section 47503, an airport operator may submit to the FAA, noise exposure maps depicting non-compatible uses as of the date such map is submitted, a description of estimated aircraft operations during a forecast period that is at least five years in the future and how those operations will affect the map. A noise exposure map must be prepared in accordance with title 14, Code of Federal Regulations (CFR) part 150, the regulations promulgated pursuant to 49 U.S.C. 47502, and developed in consultation with public agencies and planning authorities in the area surrounding the airport, state and Federal agencies, interested and affected parties in the local community, and aeronautical users of the airport. In addition, an airport operator that submitted a noise exposure map, which the FAA determined is compliant with statutory and regulatory requirements, may submit a noise compatibility program for FAA approval that sets forth measures the operator has taken or proposes to take to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The FAA completed its review of the noise exposure map and supporting documentation submitted by the Port of Seattle and determined the noise exposure map and accompanying documentation are compliant with applicable requirements. The documentation that constitutes the noise exposure map includes the current and forecast noise exposure map graphics, the 2022 Existing Condition Noise Exposure Map and 2032 Future Condition Noise Exposure Map, and other narrative, graphic or tabular representations of the data required by 14 CFR A150.101 and 49 U.S.C. 47503. This determination is effective on October 26, 2026. FAA's determination on an airport's noise exposure map is limited to a finding that the noise exposure map was developed in accordance with the 49 U.S.C. 47503 and procedures contained in 14 CFR A150.101. FAA's acceptance of an NEM does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program. If questions arise concerning the precise relationship of specific properties within noise exposure contours depicted on a noise exposure map, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of 49 U.S.C. 47506. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under 14 CFR part 150 or through FAA review and acceptance of a noise exposure map. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted a noise exposure map or with those public agencies and planning authorities with which consultation is required under 49 U.S.C 47503. The FAA relied on the certification by the airport operator that the consultations and opportunity for public review required under 14 CFR 150.21 has been accomplished during the development of the noise exposure maps. Copies of the noise exposure map and supporting documentation and the FAA's evaluation of the noise exposure maps are available for examination at the following locations:

Federal Aviation Administration, Northwest Mountain Region, Airports Division, 2200 S. 216th Street, Des Moines, WA 98198.

Seattle-Tacoma International Airport, Port of Seattle, 17801 International Blvd., SeaTac, WA, 98158.

Questions may be directed to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Issued in Des Moines, Washington, on October 26, 2026.

Jason Ritchie,

Director (Acting), ANM Airports Division, ANM–600, Northwest Mountain Region Airports Division.

[Docket No. FHWA–2026–1255]

Agency Information Collection Activities: Notice of Request for Extension of a Currently Approved Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of request for extension of currently approved information collection.

SUMMARY: The FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval for extension of an existing information collection that is summarized below under **SUPPLEMENTARY INFORMATION**. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by January 8, 2027.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 1255by any of the following methods:
