Drawing Costs

The USPTO estimates that the costs to produce design drawings can range from $50 to $350 per sheet. Taking the average of this range, the USPTO estimates that it can cost $200 per sheet to produce design drawings. On average, 10 sheets of drawings are submitted for an application resulting in an average cost of $2,000 to produce the design drawings. The USPTO estimates that 140 respondents will file international design applications indirectly through the USPTO for transmission to the IB. The USPTO further estimates that it will receive approximately 3,870 international design applications from the IB where applicants have designated the U.S., accompanied by payment of the first part of the designated fee for substantive examination by the USPTO. The USPTO estimates that all of the 4,010 design applications will be submitted with drawings. Overall, the costs associated with submitting these drawings are estimated to be $8,020,000.

Postage Costs

Although the USPTO prefers that the items in this information collection be submitted electronically, responses may be submitted by mail through the United States Postal Service. The USPTO estimates that 1% of the 5,633 items in this information collection will be submitted in the mail, resulting in 56 mailed items.
