III. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States, and that were packaged, labeled, and released for shipment prior to the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. In any order issued in response to these requests, EPA anticipates including the following provisions for the treatment of any existing stocks of the products listed in Unit II:

For voluntary cancellations of the registrations listed in Table 1 of Unit II, registrants will be permitted to sell and distribute existing stocks of voluntarily canceled products for 1 year after the effective date of the cancellation order. Thereafter, registrants will be prohibited from selling or distributing the products identified in Table 1 of Unit II, except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Once EPA has approved labels for the products listed in Table 2 of Unit II, (amended to reflect the requested amendments to terminate uses), registrants will be permitted to sell or distribute products under the previously approved labeling for a period of 18 months after the date of publication of the cancelation order in the **Federal Register**, unless other restrictions have been imposed. Thereafter, registrants will be prohibited from selling or distributing the products whose labels include the terminated uses identified in Table 2 of Unit II, except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Persons other than the registrant will generally be allowed to sell, distribute, or use existing stocks of the canceled products and products whose labels include the terminated uses until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled products and terminated uses.

Total Annual Burden: 37,129 hours.

Annual Cost Burden: $7,159,040.

Needs and Uses: On August 8, 2025, the Commission released a Second Report and Order, FCC 25–48, IB Docket Nos. 22–411 and 22–271, titled ''Expediting Initial Processing of Satellite and Earth Station Applications; Space Innovation.'' In this Second Report and Order, the Commission streamlines, simplifies, and modernizes the processing of space and earth station applications. Specifically, the Second Report and Order: (1) adopts a new process by which earth station operators may receive a baseline license without identifying a specific satellite point of communication, and adopts a procedure by which earth station applicants can easily add or remove identified points of communication; (2) expands the list of license modifications that do not require prior authorization; (3) eliminates the requirement to retain paper copies of applications; (4) changes the default ex parte status of all space station and earth station applications from ''restricted'' to ''permit-but-disclose;'' (5) adopts expanded timeframes to file license renewal applications for earth stations and replacement applications for non-geostationary orbit (NGSO) space stations; (6) provides non-U.S. licensed market access grantees the ability to receive the equivalent of a grant of special temporary authority; and (7) adopts a 30-day shot clock for earth station renewal applications.

The relevant rules for purposes of this revised information collection are §§ 25.110(e), 25.117(i), 25.118(a)(3), 25.118(b)(1), 25.118(b)(2), 25.118(b)(3), 25.118(e)(4), 25.118(h), and 25.137(h).

On May 1, 2026, the Commission released a Report and Order, FCC 26–26, SB Docket No. 25–157, titled ''Modernizing Spectrum Sharing for Satellite Broadband.'' In this Report and Order the Commission replaced the Equivalent Power Flux Density (EPFD) framework with modern, performance-based geostationary orbit (GSO) protection criteria that take account of the improved spectrum sharing possibilities that modern satellite technology has brought, including through use of adaptive coding and modulation (ACM). As relevant to this information collection, a non-geostationary orbit (NGSO) FSS applicant must either certify that it has completed a coordination agreement with any operational co-frequency GSO satellite network, or submit for Commission approval a compatibility showing which demonstrates by use of a degraded throughput methodology that it will not cause unacceptable interference to any such system with which coordination has not been completed.

The relevant rules for purposes of this revised information collection are §§ 25.146(a)(3) and 25.289(a)(2).

The new information collection requirements in this collection remove previously required information collections that are no longer considered necessary. In addition, the new information is required to ensure that applicants are meeting the Commission's rules when they modify their systems without prior approval from the Commission. In addition, the information is required to ensure that the public and the Commission are provided with accurate information about the operations of a system. amended the registration and verification requirements for individual users.

Federal Communications Commission.

Notice is given that a second amended complaint (the ''amended complaint'') has been filed with the Federal Maritime Commission (the ''Commission'') by Orleans International, Inc. (the ''Complainant'') against Hapag Lloyd AG (the ''Respondent''). Complainant states that the Commission has subject-matter jurisdiction over the amended complaint pursuant to the Shipping Act of 1984, as amended, 46 U.S.C. 41301 *et seq.* and 41310, and personal jurisdiction over Respondent as a vessel-operating ocean common carrier, as defined in 46 U.S.C. 40102(18).

Complainant is a corporation existing under the laws of the state of Michigan with its principal place of business located in Farmington Hills, Michigan.

Complainant identifies Respondent Hapag Lloyd AG as a company existing under the laws of the Federal Republic of Germany with its principal place of business located in Hamburg, Germany, whose agent in the United States is Hapag-Lloyd (America) LLC, a limited liability company existing under the laws of the state of Delaware with its principal place of business located in Atlanta, Georgia.

Complainant alleges that Respondents violated 46 U.S.C. 41102(c); 41104(a)(10) and (14); and 46 CFR 545.5. Complainant alleges these violations arose from the assessment of demurrage and detention charges during periods of time in which Complainant's ability to pick up or return containers was constrained due to circumstances beyond its control, Respondent's lack of engagement in attempted dispute resolution, and other acts or omissions of Respondent.

An answer to the amended complaint must be filed with the Commission within 25 days after the date of service.

The full text of the amended complaint can be found in the Commission's electronic Reading Room at *https://www2.fmc.gov/readingroom/proceeding/26-04/.* This proceeding has been assigned to the Office of Administrative Law Judges.
