That notice set a deadline of 5:00 p.m. Eastern Time on January 4, 2027, for filing written comments on the PAD and Scoping Document 1 (SD1) and contained specific instructions on how to file comments electronically or to mail written comments to the Commission. The notice and SD1 did not include a location for the public scoping sessions meetings and environmental site review; this notice provides the location, date, and time for the scoping sessions and site environmental site review.

All interested individuals and entities are invited to attend one or both of the following scoping sessions and environmental site review.

Based on all oral and written comments, a Scoping Document 2 (SD2) may be issued. Scoping Session Objectives

The primary goal of these scoping sessions is to have you identify the specific environmental issues and concerns that should be considered in the environmental document. Commission staff will prepare either an environmental assessment (EA) or an environmental impact statement (EIS) that will present Commission staff's independent analysis of the issues. The Commission's scoping process will help determine the required level of analysis and satisfy the NEPA scoping requirements, irrespective of whether the Commission prepares an EA or an EIS.

Scoping session participants should come prepared to discuss their issues and/or concerns. Please review the PAD and SD1 in preparation for the scoping sessions.

Meeting Procedures

The scoping sessions will begin promptly at their respective start times listed above. If you wish to speak, Commission staff will hand out numbers in the order of your arrival. If no additional numbers have been handed out and all individuals who wish to provide comments have had an opportunity to do so, staff may conclude the session a half hour earlier than the scheduled time.

Your oral comments will be recorded by a court reporter (with FERC staff or FERC representative present) and become part of the public record for this proceeding. Transcripts will be publicly available on FERC's eLibrary system. If a significant number of people are interested in providing oral comments
