B. Need and Uses

GSA requires organizations desiring to do business with GSA for various supplies and services to provide procurement-related information through solicitations issued in accordance with the Federal Acquisition Regulation (FAR) Part 12, 14, 15 and 16 procedures. Using solicitation methods such as Requests for Proposals (RFP), Requests for Information (RFI), and Broad Agency Announcements (BAA), GSA requests information from prospective offerors such as pricing information, delivery schedule compliance, and evidence that the offeror has the resources (both human and financial) to accomplish requirements. Much of the solicitation information collected is covered by FAR clauses and the separate information collection approvals associated with them. Other GSA solicitation requirements call for more detailed or technical information to be provided, such as project management or sustainability plans, and drive the need for this information collection.

C. Public Comments

GSA invites the public to comment on an extension concerning contract solicitation information. GSA invites comments on: whether the proposed collection of information is necessary, including whether the information will have practical utility; the accuracy of the estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including the use of automated collection techniques or other forms of information technology. OMB has approved this information collection for use through March 31, 2027. GSA proposes that OMB extend its approval for use for three additional years beyond the current expiration date.
