development of the analytical approach for the REA also takes into account public comments and discussion at a CASAC consultation on a supplement to the IRP, Volume 3.[5]

The PA, when final, serves to ''bridge the gap'' between the scientific and technical information in the final ISA and the air quality, exposure and risk analyses available in the review, and the judgments required of the Administrator in determining whether to retain or revise the existing NAAQS for Pb. The draft PA builds upon information presented in the final ISA and the draft exposure and risk analyses (details of which are presented in an appendix to the draft PA). The draft PA will be available on or about November 18, 2026, on the EPA's website at *https://www.epa.gov/naaqs/lead-pb-air-quality-standards,* accessible under ''Policy Assessments'' for the current Pb NAAQS review. Comments on the draft PA should be submitted to the docket, as described above, by December 18, 2026. The EPA will consider comments submitted in response to this notice when revising the document.

The EPA is also soliciting advice and recommendations from the CASAC by means of a review of this draft document at an upcoming public meeting of the CASAC. Information about this public meeting, including the dates and location, will be published as a separate notice in the **Federal Register**. Following the CASAC meeting, the EPA will consider comments received from the CASAC and the public in preparation of the final PA.

The draft document briefly described in this notice does not represent and should not be construed to represent any final EPA policy, viewpoint, or determination.

Erika N. Sasser,

Director, Impacts and Ambient Standards Division, Office of Clean Air Programs, Office of Air and Radiation.

Sunshine Act; Open Commission Meeting Thursday, November 19, 2026

November 12, 2026.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, November 19, 2026, which is scheduled to commence at 10:30 a.m. in the Commission Meeting Room of the Federal Communications Commission, 45 L Street NE, Washington, DC.

While attendance at the Open Meeting is available to the public, the FCC headquarters building is not open access and all guests must check in with and be screened by FCC security at the main entrance on L Street. Attendees at the Open Meeting will not be required to have an appointment but must otherwise comply with protocols outlined at: *www.fcc.gov/visit.* Open Meetings are streamed live at: *www.fcc.gov/live* and on the FCC's YouTube channel.

[5] The document provided to the CASAC Panel for this consultation, *Health Risk and Exposure Analyses in Support of the Review of the National Ambient Air Quality Standards for Lead, Update on Two Aspects of the Analytical Approach,* is available on the EPA's website (*https://www.epa.gov/naaqs/lead-pb-standards-planning-documents-current-review*) and in the docket for this review (*https://www.regulations.gov*).

Item No.	Bureau	Subject
1	Wireless Telecommunications	*Title*: Combatting Contraband Wireless Device Use in Correctional Facilities (GN Docket No. 13–111). *Summary*: The Commission will consider a Report and Order that would authorize non-federal operation of radio frequency jamming solutions in the limited context of correctional facilities, in compliance with applicable congressional statutes. It will also consider a Further Notice that would seek comment on a proposed framework to authorize jamming solutions on unlicensed spectrum, the application of jamming solutions to satellite communications, and potential additional safeguards.
2	Wireless Telecommunications	*Title:* Unleashing American Drone Dominance (GN Docket No. 26–74) and Facilitating Opportunities for Advanced Air Mobility (WT Docket No. 24–629). *Summary:* The Commission will consider a Report and Order that would amend the rules governing three bands, the 450 MHz band, the 24.45–24.65 GHz band, and the 849–851 MHz/894–896 MHz band, to support the deployment of Unmanned Aircraft Systems (UAS), counter-UAS technologies, and expanded aviation broadband connectivity.
3	Wireline Competition	*Title:* Numbering Policies for Modern Communications (WC Docket No. 13–97); Telephone Number Requirements for IP-Enabled Service Providers (WC Docket No. 07–243); and Implementation of TRACED Act Section 6(a)—Knowledge of Customers by Entities with Access to Numbering Resources (WC Docket No. 20–67). *Summary:* The Commission will consider a Fourth Report and Order and Fourth Further Notice of Proposed Rulemaking as an important next step in furthering the Commission's efforts to protect national security interests and to secure the nation's numbering resources against bad actors.
4	Wireline Competition	*Title:* Reforming the High-Cost Program for an All-IP Future (WC Docket No. 26–96) and Connect America Fund: A National Broadband Plan for our Future High-Cost Universal Support (WC Docket No. 10–90). *Summary:* The Commission will consider a Report and Order that would adopt a limited two-year extension of Alternative Connect America Cost Model (A–CAM I) support through December 31, 2028. A–CAM I currently provides predictable, model-based support to rural rate-of-return carriers in exchange for defined broadband deployment obligations, and this extension would prevent a loss of support for nine carriers while the Commission considers broader reforms to its high-cost support mechanisms.
5	Consumer And Governmental Affairs	*Title*: Modernizing TRS Compensation (CG Docket No. 03–123). *Summary:* The Commission will consider a Notice of Proposed Rulemaking that takes first principles approach to compensation for Telecommunications Relay Services to ensure TRS remains available and aligned with user expectations in the rapidly changing communications landscape.
6	Space	*Title:* Amendments of Parts 2 and 25 of the Commission's Rules to Facilitate the Use of Earth Stations in Motion Communicating with Geostationary Orbit Space Stations Frequency Bands Allocated to the Fixed Satellite Service (IB Docket No. 17–95); Facilitating the Communications of Earth Stations in Motion with Non-Geostationary Orbit Space Stations (IB Docket No. 18–315). *Summary:* The Commission will consider a Third Report and Order that would expand non-geostationary orbit Earth Stations in Motion operations in the fixed-satellite service across the entire 28.35–28.6 GHz band, thereby supporting the deployment of mobile broadband services to remote and rural locations on land, as well as providing ubiquitous connectivity to ships, planes, drones, blimps, cars, and other critical on-the-go devices, thereby furthering U.S. leadership and expansion in the growing space economy.

Congress has established 911 as the national emergency number to enable all citizens to reach emergency services directly and efficiently, irrespective of whether a citizen uses wireline or wireless technology when calling for help by dialing 911.

Efforts by federal, state, and local government, along with the significant efforts of wireline and wireless service providers, have resulted in the nearly ubiquitous deployment of this life-saving service.

RAY BAUM'S Act defines a ''9–1–1 call'' as a voice call that is placed, or a message that is sent by other means of communication, to a Public Safety Answering Point (PSAP) for the purpose of requesting emergency services.

As part of implementing Section 506 of RAY BAUM'S Act, on August 1, 2019, the Commission adopted a *Report and Order* (*2019 Order*) that set forth rules requiring Fixed Telephony providers and MLTS providers to ensure that dispatchable location is conveyed with 911 calls.
