SUPPLEMENTARY INFORMATION: The collection of information contained in the Logging Operations Standard is necessary to reduce workers' risk of death or serious injury by requiring employers to ensure operating and maintenance instructions are available on machines or in the area where the machine is operated. For vehicles, employers must ensure that operating and maintenance instructions are available for each vehicle. The Standard also requires the employer to provide training to workers and to certify that they have provided this training. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on March 25, 2026 (91 FR 14596).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.
