Endangered and Threatened Wildlife and Plants; Endangered Species Status for Mazama Newt

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to list the Mazama newt (*Taricha granulosa mazamae*), an amphibian species from the Crater Lake caldera in Crater Lake National Park in Klamath County, Oregon, as an endangered species under the Endangered Species Act of 1973, as amended (Act). This determination also serves as our 12-month finding on a petition to list the Mazama newt. After a review of the best scientific and commercial data available, we find that listing the species is warranted. If we finalize this rule as proposed, it would add this species to the List of Endangered and Threatened Wildlife and extend the Act's protections to the species. We find that designating critical habitat for this species is not determinable at this time.

DATES: Comments will be accepted on or before January 19, 2027. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. eastern time on the closing date.
