Attachment—Exemption

NUCLEAR REGULATORY COMMISSION

Docket Nos. 52–025 and 52–026

Southern Nuclear Operating Company

Vogtle Electric Generating Plant, Units 3 and 4

Exemptions

I. Background.

Southern Nuclear Operating Company (SNC, the licensee) is the holder of Combined License Nos. NPF–91 and NPF–92 for the Vogtle Electric Generating Plant (Vogtle), Units 3 and 4, respectively. The licenses state, among other things, that the licensee is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC, the Commission) now or hereafter in effect. These facilities consist of two pressurized-water reactors located at the licensee's site in Burke County, Georgia, respectively.

On July 17, 2024, NRC issued a final rule incorporating by reference Regulatory Guide (RG) 1.147, ''Inservice Inspection Code Case Acceptability, ASME Section XI, Division 1,'' Revision 21 (Agencywide Documents Access and Management System (ADAMS), Accession No. ML23291A003), into Title 10 of the *Code of Federal Regulations* (10 CFR) 50.55a(3)(ii) (89 FR 58039). This RG determined American Society of Mechanical Engineers Boiler and Pressure Vessel Code, Section XI (ASME BPV XI) Code Case N–921, ''Alternative 12-yr Inspection Interval Duration, Section XI, Division 1,'' to be conditionally acceptable. This code case allows NRC licensees to implement an inservice inspection (ISI) program based upon a 12-year ISI interval, as opposed to the traditional 10-year ISI interval required by ASME BPV XI, Article IWA- 2431. RG 1.147, Revision 21, specifies four conditions on Code Case N–921.

Condition 2 states, ''This code case can only be implemented at the beginning of an ISI interval as part of a routine update of the ISI program.'' The July 17, 2024, final rule also added 10 CFR 50.55a(y), which includes a definition for the term ''inservice inspection interval.'' This definition, in part, specifies that the length of the ISI interval is described in ASME BPV XI, Article IWA–2431.

II. Action.

By application dated April 27, 2026 (ML26117A373), the licensee, pursuant to 10 CFR 50.12, ''Specific exemptions,'' requested exemptions from certain requirements of 10 CFR 50.55a(a)(3)(ii) and 10 CFR 50.55a(y) to allow the use of Code Case N–921 after the start dates of the first ISI interval at Vogtle, Units 3 and 4, which is not in accordance with Condition 2 on Code Case N–921, as specified in RG 1.147, Revision 21. The first ISI interval at Vogtle, Units 3 and 4, began on July 31, 2023, and April 29, 2024, respectively. The end of the current 10-year first ISI interval is July 30, 2033, and April 28, 2034, for Vogtle, Units 3 and 4, respectively. The end of the proposed 12-year first ISI interval is July 30, 2035, and April 28, 2036, for Vogtle, Units 3 and 4, respectively. The licensee stated that the ASME Section XI Code of Record for the Vogtle, Units 3 and 4, first ISI Interval is the 2019 Edition. The licensee stated that the Vogtle, Units 3 and 4, augmented inspection examination schedules will remain unchanged. The licensee also stated that the exceptions of IWB–2411(a), IWC–2411(a) and IWD–2411(a) will be applied to Table 1 of Code Case N–921 when implemented.

III. Discussion.

Pursuant to 10 CFR 50.12(a), the Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR part 50 when (1) the exemptions are authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security and (2) special circumstances are present. Under 10 CFR 50.12(a)(2), special circumstances
