Item No.	Bureau	Subject
		Summary: The Commission will consider a Report and Order that would adopt a limited two-year extension of Alternative Connect America Cost Model (A–CAM I) support through December 31, 2028. A–CAM I currently provides predictable, model-based support to rural rate-of-return carriers in exchange for defined broadband deployment obligations, and this extension would prevent a loss of support for nine carriers while the Commission considers broader reforms to its high-cost support mechanisms.

Authority: This meeting is held, in accordance with the Government in the Sunshine Act (Sunshine Act), Public Law 94–409, as amended (5 U.S.C. 552b).

Synopsis

With this Public Notice, the Wireless Telecommunications Bureau (Bureau) seeks comment on whether the proposed Relocation Coordinator selected by the eligible space station operators in the Upper C-band satisfies the criteria established by the Commission in the *Upper C-band R&O.*

On July 24, 2026, the Commission released the *Upper C-band R&O,* which adopted rules to make 160 megahertz of mid-band spectrum available for flexible use throughout the contiguous United States by transitioning incumbent Fixed Satellite Service (FSS) operations out of 4.0–4.16 GHz.

The *Upper C-band R&O* required eligible Fixed Satellite Service (FSS) space station operators to select, no later than January 1, 2027, a Relocation Coordinator that will be responsible for managing the overall transition and coordinating relocation actions among eligible FSS space station operators, incumbent FSS earth station operators, and new Upper C-band flexible use licensees. The *Upper C-band R&O* required that the Relocation Coordinator ''must be able to demonstrate that it has

the requisite expertise to perform the duties required in this context, which broadly include: (1) coordinating the schedule for clearing the band; (2) performing engineering analysis, as necessary, to determine necessary earth station migration actions; (3) assigning obligations, as necessary, for earth station migrations; (4) coordinating with the Upper C-band licensees throughout the transition process; (5) assessing and tracking the completion of the transition in each PEA and determining the Upper C-band wireless licensees' ability to commence operations; and (6) mediating scheduling disputes.''

On November 17, 2026, all three eligible space station operators announced that they had selected RSM US LLP (RSM) to serve as the Relocation Coordinator. We seek comment on whether RSM satisfies the selection criteria established by the Commission in the *Upper C-band R&O.*

As directed by the Commission in the *Upper C-band R&O,* following the comment period, the Bureau will issue a final order determining whether the selection criteria have been satisfied. In the event the selection criteria are not met, the selection committee will restart its evaluation process and identify a new proposed entity that will be subject to the same public comment and review process by the Bureau.

Chief of Staff, Wireless Telecommunications Bureau.
